Contract Participation

- 1983 Associate Investigator in field project sponsored by Alabama Coal Association during summer, 1983, to investigate the distribution, status and biology of the Flattened Musk Turtle *(Sternotherus depressus)*, a potentially endangered or threatened species. Served in consultant status. Total contract funds for project = \$76,000.
- 1991 Co-Investigator in project sponsored by Birmingham Water Works Board to assess the population status of the federally-threatened Flattened Musk Turtle *(Sternotherus depressus)* on the Locust Fork River. Project also assessed habitat potential for turtle if planned impoundment of portions of river occurs. Total contract funds = \$36,000.

2009-2015 Performed stream fish surveys to evaluate health of Jefferson County urban streams for Jefferson County Stormwater Authority.
