Personal statement about LECHN

“I chose to take part in the LECHN traineeship program because I have a strong desire to build my knowledge base and educate student nurses about current issues affecting children's health. I believe that the program has provided me with valuable opportunities and experiences that I would have not been able to receive in any other nursing program. Being a LECHN fellow has been a great experience and I encourage students who are interested in expanding educational and professional development in the area of child health nursing to seek out the LECHN traineeship program in achieving their goals.”
