

Science Teacher Workshop

Sarah Dudik | Gadsden Times August 9, 2012

Jennie Thomas, a first-grade teacher at Walnut Park Elementary, and Annalisa Brewster, a fifth-grade teacher at Floyd Elementary School, compare their isopods as they try to identify what type of bugs they have by using science notebooks as a tool. Elementary school teachers from four different schools worked with pill bugs and sow bugs during a workshop about using science notebooks to promote literacy August 9, 2012 at the Parent Teacher Resource Center for Gadsden City Schools in Gadsden, Ala. The workshop was presented by staff members from the Alabama Hands-on Activity Science Program from the University of Alabama at Birmingham.
