

PURDUE-UAB BOTANICALS RESEARCH CENTER
PROJECT SOLICITATION FOR 2009 COMPETING RENEWAL

Dear Botanicals Research Center Core and Project Leaders, and all Faculty:

We are beginning the planning process for the Botanicals Research Center competing renewal application in 2009.

We are very interested in soliciting your brief proposals for R01 level projects that could be part of the submission. We are looking for a 1 page project proposal setting out the aims, significance, and potential collaborators. Please send your proposals with an NIH Biosketch to CJ Krueger at the email address by **February 1, 2008**.
kruegerc@purdue.edu

The competitive renewal also will consider innovative ideas for new Cores/Core components within the Botanicals Research Center. If you have an interest in developing a component for a Core, forward a paragraph to CJ Krueger by February 1, 2008 at **kruegerc@purdue.edu**.

These proposed ideas will be reviewed by the External Advisory Committee and Internal Steering Committee to give feedback for developing full proposals. Thanks for your ideas and interest as we seek to assemble a very strong competing application.

The goal of this process is to advance and let the Center serve as a resource for all projects. We expect that all good ideas will be developed into grant applications, both within the Center application or as individual RO1s. The infrastructure of the Center can make RO1 applications more competitive.

Connie
