UAB Department of Mathematics

MA 125-6B  Calculus I  Spring, 2014  Call # 31918

Course Instructor:  Dr. J. S. Hutchison
Office Location:  CH 482B  Office Phone #: (205)-934-2154
E-mail:  hutchiso@uab.edu
Office Hours:  TuTh 1:30 – 2:30 PM, Wed 2:30 – 4 PM
Other times by appointment and by dropping in
Meeting Times:  Mon/Wed 10:10 am to 12:00 pm  Meeting Location:  HHB 125
Prerequisite:  Grade of C or better in MA 106, MA 107 or equivalent
Credit:  4 semester hours
Textbook:  Essential Calculus—Early Transcendentals by James Stewart, Thomson-Brooks/Cole, 2/e, Chapters 1-4
Available at bookstores or see http://www.cengagebrain.com/micro/5PI-2OWN for options.

Important Dates:
- First day of classes: Monday, January 6, 2014
- Last Day to Drop/Add (without paying full tuition & fees): Monday, January 13, 2014
- MLK Holiday: Monday, January 20, 2014
- Last day to withdraw with “W”: Monday, March 31, 2014
- Spring Break: Mon – Fri, March 24-28, 2014
- Last day of classes: Friday, April 18, 2014

Major Exams (tests)
- Test I: near Monday, January 27 (1.1-1.6, 2.1-2.2)
- Test II: near Monday, February 17 (2.2-2.8)
- Test III: near Monday, March 11 (3.1-3.3,3.5,3.7)
- Test IV: near Monday, April 14 (4.1-4.5, 4.7)

Final Exam:  Wednesday, April 23, 1:30 – 4:00 pm
(Location to be announced.)

Course Policies

- Please make sure that you are able to receive e-mail through your Blazer-ID account. Your instructor will be communicating important announcements this way.
- Turn off all cell phones during class.
- If you are contacted by the Early Alert Program, consider taking advantage of the services provided.
- If you wish to request a disability accommodation please contact Disability Support Services at 934-4205 or at dss@uab.edu.
- The two lowest quiz grades and the two lowest homework grades will be dropped to account for any missed assignments due to illness or any other circumstance. If a test is missed due to a serious verifiable circumstance or official university business, the test grade will be replaced with the properly rescaled final exam score. The instructor will need to be advised of such circumstances at the earliest possibility.
- No books, notes, or calculators will be allowed during any of the tests or quizzes.

Methods of Teaching and Learning:
- Class meetings of 110 minutes consisting of lectures and discussion of examples and homework problems. Time for quizzes and four in-class tests is also included.
- Students are expected to undertake at least 10 hours of private study and homework per week.
• The on-line homework system Enhanced WebAssign will be used. More information follows below on this.

Aims of the Course:
Upon successful completion of the course, a student
• understands limits from a numerical, graphical, and analytic point of view;
• can use limits to define the concepts of continuity and differentiability;
• can demonstrate a solid understanding of the major results of differential calculus;
• can apply the rules of differentiation;
• is able to apply derivatives to problems related to rates of change, linear approximations, optimization, and curve sketching; and
• can use antiderivatives to solve motion problems.

Course Content:
• Motivation: Slopes of curves, tangents, velocity, and other difference quotients
• Definition of limit, limit laws, limits involving infinity
• Continuity and classification of discontinuities (singularities), Intermediate Value Theorem
• Tangents, velocities, other rates of change, definition of derivative, and derivatives as functions
• Derivatives of polynomial, exponential, and trigonometric functions
• Product and quotient rules
• Chain rule, implicit differentiation, related rates
• Derivatives of inverse trigonometric and logarithmic functions
• Indeterminate forms, L’Hopital’s Rule
• Linear approximation
• Maximum and minimum values, Mean Value Theorem, shapes of curves
• Optimization Problems
• Antiderivative introduction, motion problems

Assessment Procedures
Student achievement will be assessed in the following ways:

a. **Regular on-line homework.** Homework will normally be due one week or less after a section is assigned. Feedback is provided when wrong answers are given. Students are able to retake the assignments (with randomly changed parameters) to obtain correct answers. A limited number of submissions is allowed during the time the set is available. Homework contributes 13% to the course average. Problems on tests are modeled after homework problems and quizzes. Staying on top of the on-line homework (as well as working daily practice problems) is therefore extremely important.

b. **Unannounced/Announced Quizzes.** Quiz problems are similar to homework problems. This allows students to gauge whether they are ready to work problems in a test situation. Quizzes and the group projects contribute 12% to the course average.

c. Four 50-minute in-class tests which will include short questions involving basic skills as well as problems requiring in-depth understanding. Each test contributes 10% to the course average.

d. A 150-minute comprehensive final examination including problems covering basic skills and in-depth understanding. The final exam contributes 35% to the course average.

• Your course performance is your course average (including the final exam score). This is a number between 0 and 100.
• Your final grade is determined according to the following table:

<table>
<thead>
<tr>
<th>Course performance</th>
<th>88-100</th>
<th>75-87</th>
<th>62-74</th>
<th>50-61</th>
<th>Below 50</th>
</tr>
</thead>
<tbody>
<tr>
<td>Final Grade</td>
<td>A</td>
<td>B</td>
<td>C</td>
<td>D</td>
<td>F</td>
</tr>
</tbody>
</table>

In addition, your grade may be raised by a strong performance on the final exam (normally at most one letter grade).

TIPS

• Help is available in the Math Learning Lab (HHB 202). M-Th 9-8, F 9-5. See schedule on math website www.math.uab.edu. There will be special tutoring hours for calculus.
• Past exams given in Calculus I are posted on the math website www.math.uab.edu for student practice. Click on Test Bank under the Student Resources link.
• Regular class attendance, working steadily and regularly, and seeking help when needed will all increase your chances to succeed in this course.
• Remember that being a full-time student is a full-time job.

How to get started on Enhanced WebAssign (the on-line homework):

The following document and video link should walk you through the registration process and give you additional information on Enhanced WebAssign: http://tinyurl.com/EWA-student-registration

Basic information on how to get started on WebAssign also appears below:

(0) Go to www.webassign.net and click on I Have a Class Key in the signin link.

(1) Enter the following course key:

   uab 9561 7323

   and proceed. (If prompted for your institution, enter uab)

(2) When prompted to purchase an access code, select… “trial period”. (You do not need to purchase an access code at this time. However, you must purchase an access code within two weeks for you to continue using the system beyond the two week trial period. The system will prompt you to enter your access code when the deadline approaches. (Your book may have an access code bundled with it. You must use it.)

(3) After your first registration, you can sign in as a returning user.

(4) Should you run into technical problems Enhanced WebAssign provides technical support online and/or by phone.

(5) Should you run into technical problems, Enhanced WebAssign provides technical support online and/or by phone.

• Chapter 1: 1.3 – 1.6
• Chapter 2: 2.1 – 2.7, Part of 2.8
• Chapter 3: 3.1-3.3, 3.5, 3.7
• Chapter 4: 4.1 – 4.5, Part of 4.7

1/4/14
