Project Narrative

Creating and mentoring the next generation of well-trained researchers in the area of health services, outcomes, and effectiveness research (HSOER) is of critical national importance as we seek to improve health care delivery and patient safety while reducing health care disparities. The UAB HSOER T32 research training program with a focus on healthcare efficiency and disparities, healthcare quality measurement and improvement and comparisons of effectiveness and safety of prevention, diagnosis, and treatment options (CER) will be used to train and mentor the next generation of HSOER researchers.
