

Translational Research

SUMMER SERIES

Wednesdays

3:30 PM - 4:30 PM

Sessions held Via Zoom

Session Date	Session Title
June 5th, 2024	What is Translation? (Intro) / Optimizing the Research Question
June 12th, 2024	Study Design, Analytic Methods & Data Management/ Introducing Clinical Trials
June 19th, 2024	Juneteenth Holiday Break
June 26th, 2024	Epidemiology/Population – Public Health/EHR Data Access
July 3rd, 2024	Fourth of July Holiday Break
July 10th, 2024	Team Science: Building Effective Translational Teams
July 17th, 2024	Community-Engaged Research/ D&I considerations at each Translational stage
July 24th, 2024	Spreading Your Message: Learning The Art of Scientific Writing
July 31st, 2024	Been There, Done That: I Can Tell You All About The Journey

Vision

The Translational Research Summer Series program provides precursory skill training for scientists and research professionals who are in the formative stages of their translational research careers. The Summer Series will create a foundation that will prepare students for success.

Series Description

The Translational Research Summer Series is a prefatory program for aspiring investigators and burgeoning scholars in translational research and provides key learning topics such as biostatistics, epidemiology, clinical trials, community research, and team science. Summer Series sessions are conducted by a distinguished group of faculty and senior leaders who bring an endless amount of knowledge and experience in translational research. Participation in the Summer Series allows each participant to implement key skills learned in each session to all facets of their academic and professional journey in research.
