

**All Student Applications
Must Include:**

- A completed application form.
- A copy of your current report card
- Recommendation letter; preferably from a science or mathematics teacher.
- A one-paragraph essay describing your personal and career interests.
- Please submit all forms at the same time to CORD. Incomplete application packets will not be reviewed. Faxed or Emailed applications will not be accepted.

**Application Deadline:
April 20, 2018**

Camp Guidelines

- Camp hours are 8:30 am - 4:00 pm daily except Friday (finishing after lunch).
- All students are required to bring a lunch daily except for Friday Pizza Day.
- Acceptance into CORD Camps will be based on available space in program.
- Tuition for first week-long Camp is \$175.00.
- A non-refundable deposit of \$50 is required for ALL applications and will be applied toward total cost of tuition.
- Full tuition must be paid prior to participation. Checks or cash only.
- No refunds!
- Notification of acceptance will be sent to students in mid-May.
- Signed Camp Guidelines, health insurance documentation and signed Photo Release Form must be completed prior to participation.
- Students may be dismissed from the academy due to misbehavior.

Academy I: Introductory Engineering
Entering 10^h graders

Session I: June 4-8, 2018

Session II: June 18-22, 2018

Introductory Engineering is a great opportunity to discover all engineering fields and get hands on engineering experience.

This program includes:

- Exposure to multidisciplinary fields of engineering i.e. electrical, materials, computer engineering
- Exploration of engineering by hands-on activities
- Interactions with engineering students, faculty and professional engineers
- Group and individual engineering projects
- A taste of college life
- Tour of an engineering company

Academy II: Advanced Engineering
Entering 11th graders

Session I: June 11-15, 2018

Session II: June 25-29, 2018

Advanced Engineering is filled with exciting, hands-on experiences using science, technology, engineering, and mathematics (STEM).

- Spend a week exploring research and careers in engineering
- Perform hands-on engineering projects
- Design your experiments and present your results
- Participate in lab demonstrations
- Learn about the roles and responsibilities of engineers
- Learn about aerospace engineering
