7 Day Greek Isles Cruise
with Dr. John Burgess
June 21-28, 2014

Current Restorative Materials
and Techniques 2014
An Update

This clinically oriented course compares new materials and evaluates their clinical success. It will not make you famous, an instant millionaire, thin, prevent hair loss nor will it correct the recession. However, it will provide thoughtful insight on controversies surrounding clinical techniques and materials and supply answers for many of your questions. Understand which material works and why it works rather than hear, "It works for me." See the newest results of long-term clinical trials, which will be presented and discussed. See the results of long term clinical trials using bulk placed and cured composite resins as well as "Universal (single bottle) Adhesives". The presentations are designed as clinical updates and clinical success with different composites, adhesives, glass ionomers, ceramic materials and cements will be demonstrated. Then when you have restored the dentition can examine how to preserve it with novel preventive systems. This fast paced course will improve your dental practice and selection of dental materials and is designed to provide information that can be used the following clinic day. These presentations will improve your practice.

Course tuition: $325 per dentist and $200 per auxiliary.
CE Hours: 8

Fly into Venice, Italy and board the Norwegian Jade on June 21. Spend Sunday at Sea, Monday in Corfu, Greece; Tuesday in Santorini, Greece; Wednesday in Mykonos, Greece; Thursday in Olympia, Greece; Friday at Sea and deport on Saturday, June 28 back in beautiful Venice, Italy.

Cruise prices start at $1,099 per person.
Port charges, taxes, and gratuities included.

For additional information, please call Jodi Murphy at 610.399.4501 or visit the Cruise and Travel Partners website at www.cruiseandtravelpartners.com
Direct Restorations
A Two-Day Lecture & Hands-On course
Friday and Saturday, January 24-25, 2014
9:00 AM to 4:00 PM

This two day course will provide a strong foundation for the practicing dentist as well as update their knowledge in current and successful materials. Day one will provide lectures in direct restorative materials and techniques while day two will move to a hands on format. The materials discussed will be used in simulated clinical situations to provide practitioners with a good understanding of which materials and techniques would be most useful in their practice. This clinically-oriented discussion compares traditional and newly developed dental restorative materials and compares their clinical success. The course is designed to improve your practice of dentistry by demonstrating which material works, where they are successful, and will show predictable techniques to handle many of your everyday clinical problems. It may not solve your staffing problems or provide instant financial success, but it will provide an evidence-based approach to controversies surrounding clinical dentistry and supply answers to many of your questions.

This fast paced course will improve your dental practice, your selection of dental materials, and is designed to provide information you can use the next day in your office. This course may be attended as lecture only on Friday or you may choose to attend the full two-day program and benefit from the extensive hands-on activities.

Educational Objectives:
After attending this course, participants will be able to:
1. Apply and use direct restoration options for conservative smile restorations.
2. Incorporate appropriate adhesive and cementation protocols specific to the restorative material and indication.
3. Understand concepts, guidelines, and techniques for tooth preparation for high strength all-ceramic restorations.

Educational Methods for both courses:
lecture, PowerPoint presentation, handouts, hands-on lab work, materials manipulation

Dr. John O. Burgess is a graduate of Emory University School of Dentistry. He received his M.S. in Biomedical Sciences from the University of Texas Health Science Center in Houston, Texas, completed a one year General Practice Residency and a two year General Dentistry Residency. Currently, Dr. Burgess is Professor and Assistant Dean for Clinical Research at UAB. He has held many positions, including Chairman of Operative Dentistry and Biomaterials, Assistant Dean for Clinical Research at LSU School of Dentistry, and military consultant to the Air Force Surgeon General. A prolific researcher, Dr. Burgess has published more than 400 articles, abstracts and textbook chapters. He is a member of the advisory board for the Dental Advisor. He is a past chair of the Biomaterials Section of the American Association for Dental Schools and has served on the Executive Board for the American Association of Dental Research. Currently, he is a consultant to the American Dental Association’s Council on Scientific Affairs. He is active in clinical evaluations of dental materials and is an investigator on clinical protocols evaluating adhesives, ceramic restoratives, fluoride releasing materials, bonded amalgam, posterior composites, impression materials, and bleaching agents. Dr. Burgess lectures extensively and has presented more than 900 CE courses.

UAB School of Dentistry is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of dental CE. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. UAB SOD is a recognized provider of continuing dental education by the Alabama Board of Dental Examiners and the Academy of General Dentistry. UAB CDE is a member of the Association for Continuing Dental Education. UAB SOD designates this activity for 6 continuing education credits per day of attendance.

Location: UAB School of Dentistry
1919 7th Ave. S., Birmingham, AL

CE Hours: UAB designates each activity for 6 continuing education credits. (12 hours total)

Tuition: Friday - lecture only:
Dentist $250  Auxiliary $125
Two-Day Course - Dentist $575

Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.ada.org/goto/cerp.
