*Exhibit location will be based on total contribution for all areas.
Course Introduction
Please note the addition of "Insight" to the course name and our thanks to UAB Insight and Dr. Julius Linn. UAB Insight is a leader in providing CME through a quarterly publication, online, and with televised presentations. We encourage physicians from across the state to take this opportunity to visit UAB and participate in this on site educational activity. The goal of the program is to provide valuable information for patient care. We also promote the accomplishments and participation of all areas of UAB Health Systems and welcome interested Departments or individuals to participate.

Educational Goals and Objectives
The course is designed to educate physicians and other medical professionals on the latest treatments and procedures available in specialty care. This is a unique opportunity to hear from nationally and internationally recognized practitioners. Whether treating your own patients, consulting someone within your system or referring to an institution like UAB there will be valuable information for a wide range of situations. During the introduction participants will learn how to readily access specialists for transfer or consultation. Presentations by speakers will give information on current care in specific areas or new diagnostic technology. Specific areas of interest can be selected from 3 educational tracks. The program will end with a question and answer session.

Accreditation
The University of Alabama School of Medicine is accredited by the Accreditation Council for Continuing Education to provide continuing medical education for physicians. The University of Alabama School of Medicine designates this educational activity for a maximum of 3 Category I credits toward the AMA Physician’s Recognition Award. Each physician should claim only those hours actually spent in the activity. UAB is a equal opportunity/affirmative action institution.

The Alabama State Board of Nursing recognizes UAB Category I CME as approved educational activity for license renewal.

Schedule of Events
Monday, October 10, 2005
