

## YOUR UAB PORTFOLIO

You will record your activities, awards, and significant experiences throughout your college career. You may choose to create an electronic version on your computer or create a hard copy version. Beginning in your freshman year, you will work with your academic advisor, career counselors, and faculty mentors to determine which elements are appropriate for your program. You will also determine the importance of each element as it relates to your goals, skills, and plans for the future. You will learn to use this information for building, job resumes and applications for graduate education as you approach graduation. Key pieces of your portfolio may become part of your capstone course in your senior year.
