Wi-Fi Setup Guide for UABSecure on Android Devices.
Open your settings menu and select Wireless
In Wireless select Wi-Fi

Wi-Fi
Connected to UABSecure.

Bluetooth
Bluetooth is turned off.

Location-Based Services
Share your approximate location using Wi-Fi with third-party apps and websites.

Airplane Mode
Select UABSecure.

Enter BlazerID and Password.
If asked for manual setup make sure your Security setting is **PEAP** and that your Phase 2 authentication is **MSCHAPV2**. Your CA certificate should show as either Don't Validate or as Unspecified.
Enter your **BlazerID** in the Identity field and **Password** in the password field. Hit **Save** and connect.
