

THE BASICS: Instructors only need to 'activate' the RLDB in their course (instructions below). Then students will need to have the RLDB installed as a browser on their machines (see below).

FOR INSTRUCTORS: In Vista 3, they will go to 'Edit Settings' on their assessments and simply check the box under the Security Settings area to enable the Respondus Lockdown Browser feature (see screenshot):

Student score release: Release the score once the assessment has been submitted. Release the score once the assessment has been submitted and all of the questions have been graded. Do not release the score.

More Options (Click on the arrow icons to expand or collapse these optional settings.)

- ▶ Dates Available
- ▶ Results Settings
- ▶ Submission Settings
- ▼ Security Settings

Proctor password:

A Student must enter this password to access the assessment.

Browser Restriction

Check this box if you want to restrict this assessment so it can only be taken with the Respondus LockDown Browser.

IP address:

IP address mask:

If students' machines must match portions of the specified IP address, in the corresponding IP address mask text boxes, enter 255. If students' machines do not need to match portions of the specified IP address, in the corresponding IP address mask text boxes, enter 0.

*Required fields

FOR STUDENTS ON CAMPUS: A request is being sent for all computers in the libraries, labs and other areas have Respondus Lockdown Browser installed.

FOR STUDENTS OFF-CAMPUS: When students try to take an exam in WebCT Vista 3 that has a required RLDB setting, they will see a 'Download Link' hyperlink when they attempt to take the assessment (see below):
