

MyNCBI

1. Set up a MyNCBI account.
2. Write out you're your search and identify the Key Concepts. This can be the condition, the treatment or diagnostic method. Decide what the appropriate BOOLEAN operators are for the concepts, AND, OR, NOT.
3. Run Search
4. Limits. You can use the Limits tab to limit to English (or other languages), [Publication Type](#) or Date range among other things.
5. Now click save search. Select Yes. Receive Email Alerts.

CINAHL – [Cumulative Index of Nursing and Allied Health Literature](#)

Cinahl is a database that indexes a different set of literature than Pubmed; it focuses on Nursing and Allied Health Literature.

– This is a very different tool compared to Google. Scholar searches a specific subset of links available on the Internet. Of the places Scholar searches Pubmed is included. You can set up preferences in Scholar to deliver links of content that we license.

– [The Cochrane Library](#) contains EBM resources. Evidence Based Medicine. Click [here](#) to see a list of the types of sources included.

Choosing the appropriate database depends on what you are looking for.

And other Bibliographic management software.
