

- Lister Hill Library provides buttons on PubMed records to allow linking to electronic full text articles, if UAB has licenses the journal. To use these buttons,
- Access PubMed through the library website: [www.uab.edu/lister/](http://www.uab.edu/lister/)
  - Choose the Quick Links or Databases and Resources page or use the search box
  - Off campus, you will be asked for your Blazer ID and password
- All publishers do not link in the same ways. If one button does not work, try another.

The screenshot shows a PubMed record for the article "A vital role for interleukin-21 in the control of a chronic viral infection" by Yi JS, Du M, Zajac AJ. The record includes the journal name "Science" and the PubMed ID "19443735". Three callouts are present:

- UAB has electronic full text. Click here to view the article.** (Points to the "LHL e-title" button)
- Publisher Link: full text might cost \$\$\$** (Points to the "Science" logo)
- Click here for UAB full text options. If no online full text is available, check for print holdings or request article via interlibrary loan.** (Points to the "LHL ARTICLE LINKER" button)

### What the links mean:

	If LHL has a subscription, this Publisher's link usually will work <i>on campus or if you have used the PubMed link on the library's website.</i>
	Find full text if LHL subscribes to the journal, or order the article through the ILLIAD document delivery system.
	LHL has an online subscription to the title. If you are off campus, the link should <i>work if you have used the PubMed link on the library's website for remote users and logged in with your Blazer ID.</i>
