Area of Expertise

Studying the mechanisms that control T cell development during an immune response

Life cycle of Human Paillomaviruses and associated malignancy

Human Papillomavirus Gene Expression, Replication, and Pathogenesis

Mechanism and Regulation of Mammalian mRNA Turnover

Molecular and Cell Biology of Human Papillomaviruses

Biomolecular NMR spectroscopy and structural biology

Regulation of gene expression during development

Axonomy, systematics, and the evolution of ecological interactions

Statistical methods in clinical trials, survival and reliability analysis, analysis of pool screening and count data, goodness-of-fit and model diagnostics, and inference for heavy tail distribution.

Obesity, quantitative genetics, clinical trials, and statistical and research methodology. He also serves as a frequent consultant and expert witness in the legal setting Biostatistical methods

Biostatistical Analysis

Major interest in design, analysis, conduct and interpretation of clinical trials, epidemiologic studies and evaluation research

Understanding how the immune system and central nervous system (CNS) communicate with each other.

Developmental Immunology/Structural Immunology

Protein trafficking in the secretory and endocytic pathways

(1) the roles of and lineage relationships between effector CD4 T cell subsets during chronic inflammatory disorders, and (2) the factors critical for the development and maintenance of CD4 T cell memory.

Understanding, at the molecular level, virus-host cell interactions/Microbiome research

Cellular and molecular basis of immune and inflammatory responses in the immune system, especially in the central nervous system (CNS).

HIV protease inhibitors suppress fatty acid oxidation; apoptosis

Identification of SP3 as a Negative Regulatory Transcription Factor in the Monocyte Expression of Growth Hormone

Protein Structural Cooperatively and Energetics

How enzymes catalyze reactions for very specific functions in the cell.

Director of the Pharmacokinetic and Pharmacodynamic shared facility

Multicenter clinical trials designed to assess the absorption and disposition of antiviral and antiretroviral drugs Cancer molecular studies; gene expression; and drug discovery and development.

Dermatology

Signal Transduction; Cytokine Structure/Function

Genetic epidemiology of cardiovascular diseases

Genetic etiology of lymphomas, uterine leiomyomas (fibroids) and the immunogenetics of HIV infection and

Natural history of viral infections and aberrant immune function common to inflammatory-mediated chronic diseases.

HPV-based screening tests, and establish best practice guidelines for the management of cervical neoplasia in HIVinfected women in India.

Field research on the prevalence and risk factors for HIV and other sexually transmitted infections (STIs), particularly in pregnant women and STD clinic attendees in Jamaica and voluntary counseling and testing for HIV in pregnancy and adherence to antiretroviral therapy in Ghana.

Perinatal epidemiologist with research interests in reproductive health, adverse perinatal outcomes, infectious diseases and HIV/STD prevention among vulnerable populations

CVD and hypertension; anti-hypertensive medications; diabetes and metabolic syndromes; renal disease; Occupational epidemiologist and pediatrician whose research interests include cancer and infectious diseases

epidemiology.

Interplay of human genetics with behavioral and environmental factors in the natural history, pathogenesis and outcomes of HIV/AIDS and other infectious diseases.

HIV management and prevention in HIV infected and at risk youth in the US/extensive experience and expertise in international global health programs through Directorship of the Sparkman Center

Day to day management of the Genomics Core Facility including the Cancer Center's Gene Expression Shared Vorkplace ramifications of HIV/AIDS Associate Dean for Academic Affairs HIV Prevention in economically disadvantaged communities STD/HIV and other reproductive health issues among adolescents and young adults Health communication, smoking cessation, and chronic disease prevention and control. She teaches courses in behavioral science and health communication.

adolescent reproductive health, including recent involvement in research on HIV/AIDS prevention; developing a consumer friendly HIV/STI prevention application for adolescents; is involved in community-based research and engagement in the greater Birmingham area Science of dissemination, implementation, and scale-up of effective health practices and programs/ Evidencebased HIV prevention, treatment, and linkage-to-care interventions Community-based Research Methodologies and interventions Understand influences on help-seeking for substance-related problems, which is uncommon, and how successful problem resolution can occur through different pathways, including "natural" resolutions without interventions and resolutions that are facilitated by professional, self-help, and lay (social network) interventions Chronic disease prevention, health behaviors, and the impact of data collection and management on research outcomes. Health services administration Study of stigma as it relates to a variety of reproductive health conditions/services, including abortion, obstetric fistula, HIV/AIDS, and gender-based violence. Methods of enhancing radiosensitization such as combinations of chemotherapy or targeted therapy with radiotherapy Prevention and treatment of systemic fungal infections. B cells; antibodies; Fc receptors; immunoglobulin-like receptors; immunopathology Predicting disease outbreaks Adaptive and Innate Immune Responses to Pneumococci and Pneumonia Vaccines Gerontology/Geriatrics/Palliative Care Infectious Diseases Pulmonary/Allergy/Critical Care/Smoking Cessation/Tuberculosis Adaptive T-cell responses in HIV-1 transmission and pathogenesis Cancer Center Administrator CMV/pathogenesis and natural history Medical informatics Gerontology, Geriatrics and Palliative Care Lymphoproliferative disorders and B-CLL in particular. HIV and STD co-infection, HIV in pregnancy and global health; an HIV PEPFAR project in Southern Haiti with a focus on improving clinical care and preventing mother-to-child transmission of HIV Mycobacterial diseases Biological characteristics of Chlamydia trachomatis and the human host immune-mediated responses on the clinical manifestations and outcomes of urogenital chlamydial infection Immune correlates of protection against HIV disease progression with a focus on cell medicated immune responses (CD4 and CD8 T cells)
Elucidating the origins and evolution of human and simian immunodeficiency viruses, and in studying HIV/SIV gene function and disease mechanisms from an evolutionary perspective
Characterization of cytotoxic T Lymphocyte (CTL) responses at various stages of HIV infection/Maintenance of memory CTL responses in HIV infection Vitamin D: Evaluation of HIV Progression and TB Treatment Outcomes in Zambia; Treatment of HIV/Tuberculosis co-infected prison populations in underdeveloped countries (Zambia) Development of a safe and effective microbicide to prevent sexual transmission of HIV. He is the UAB site leader for the NIH-funded Microbicide Trials Network Sexually transmitted diseases Investigate viral and cellular factors that affect mucosal HIV-1 transmission

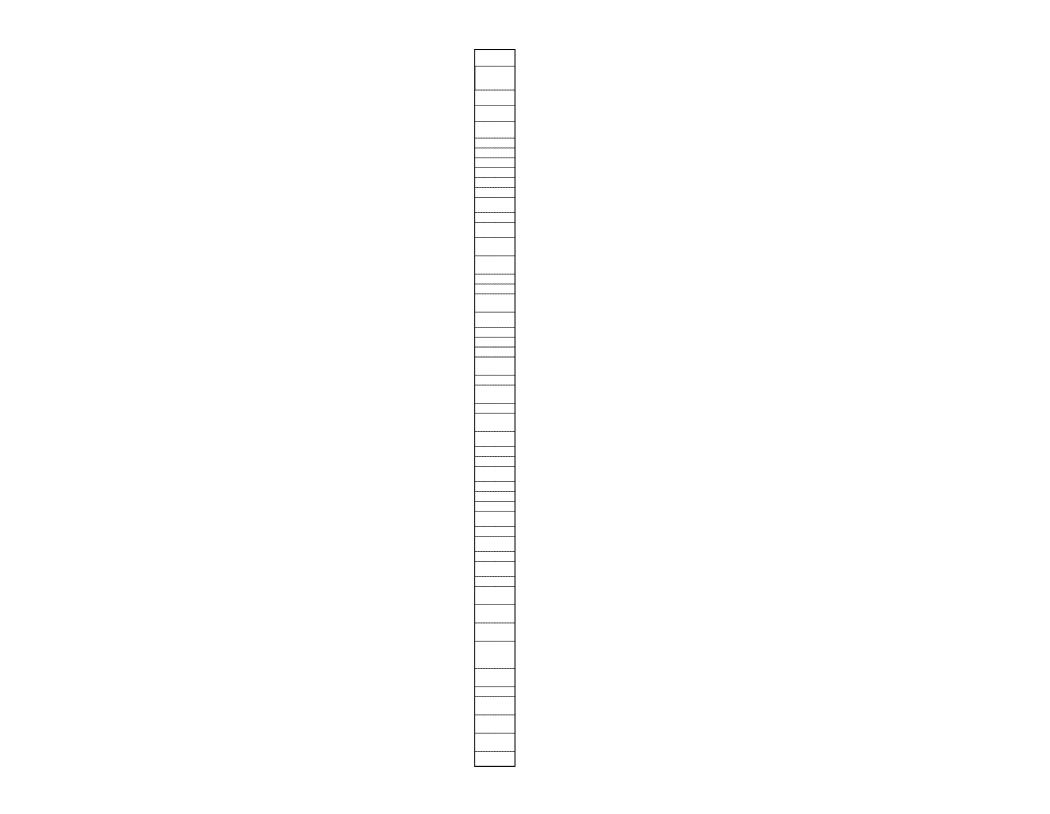

HIV drug development and pathogenesis, especially the detection and implications of viral drug resistance

Molecular biology of the human immunodeficiency virus type 1 (HIV-1), and the development of lentiviral-based vectors for gene delivery
Addiction and medical care for the homeless and other underserved populations
Use of molecular immunology and immunogenetics to identify susceptibility and severity factors for human
autoimmune disease and to identify new targets for therapeutic approaches. Operational and programmatic issues related to drug-resistant TB case management, integration of TB-HIV care, screening/diagnostic strategies for identifying TB in HIV infected poulation
Nephrology
Treatment of HIV/Tuberculosis co-infected prison populations in underdeveloped countries (Zambia) Molecular biology of latent HIV-1 infection/HIV-1 eradication strategies/drug discovery
Association between gamma/delta T cell recovery and disease-free survival in allogeneic bone marrow
transplantation patients / evaluation and translation of innate cell-based therapies for Glioblastoma Multiforme Anti-viral drug discover against arboviruses and malaria.
Clinical Trials Design, Conduct and Management
Gamma-delta T cells
Safe and effective HIV vaccine using human adenovirus (Ad)-based delivery strategies
HIV and Palliative care and pain
Gene Therapy, Immunogenetics, Medicine, Microbiology, Pathology, T-cell Aging, T-cell Imaging HIV health services utilization ranging from diagnosis and initial linkage to care to long-term clinical outcomes with particular emphasis on engagement in outpatient HIV treatment and health care disparities Sexually transmitted diseases
HCV and HIV Clinical Trials Networks
Transplant associated infections including invasive mycoses/ diagnosis, epidemiology and new therapeutic
approaches for invasive candidiasis, cryptococcosis, aspergillosis, sporotrichosis, blastomycosis, and histoplasmosis.
Tistopiesinosis. Economic methods for the evaluation of health interventions and econometric methods for the analysis of secondary data
CFAR Administrative Director
B Cell Differentiation; influenza;Generation of Memory CD8 T cells Health outcome research in patients living with HIV, social/family support for patients living with HIV, gay men's
health issues, health promotion/HIV prevention in men who have sex with men, and health policy.
HIV-specific T cells from different compartments and their role in the pathogenesis of HIV infection.
Studies of HIV and HCV clinical, translational, and outcomes research
DNA Sanger Sequencing technology
Cancer prevention among low-income, minority (Latinas and African Americans), and immigrant women; (2) socioeconomic status and health outcomes; and (3) depression. Developmental genetics; clinical immunology
Pathogenesis of bacterial vaginosis and its relationship to the acquisition of STDs as well as epidemiology and
Partiogenesis of bacterial vaginosis and its relationship to the acquisition of 51 Ds as well as epidemiology and control of trichomoniasis drug development
Human retroviruses; molecular virology and pathogenesis
Macrophage HIV-1 infection and the gastrointestinal tract reservoir
Cystic Fibrosis and Molecular Genetics; Patient Oriented Research Lung host defense research
HIV-1 infection, vaccination against hepatitis B virus, and infection-related malignancies
Sexually transmitted diseases/ HSV-2 and HIV Co-infection
Bone density and metabolism; osteoporosis and HIV lipodystrophy
Gastroenterology Investigating health disparities and the influence of gene/environment interactions on body composition and free
fatty acids
Quality improvement and medical informatics have found expression in both research into quality issues in HIV primary care, as well as the integration of medication dosing decision support into the 1917 Clinic electronic
medical record. Targeted Activation of Innate Immune Functions Against Mtb in HIV/TB Co-infection; HIV Latency
Molecular regulation of B lineage cell development, Molecular regulation of V(D)J recombination and antibody
repertoire formation, Abnormal B cell functions in autoimmune diseases, such as SLE and RA, B cell anti-HIV response, Pathogenesis of B cell malignancies
response, r autogenesis or b cell malignations
Host defense functions of complement as it relates to bacterial meningitis and malaria Bacterial and animal genetics to identify and study important mechanisms in protection and virulence against
colonization and invasive disease
Normal and abnormal development of immune system cells Combining electron microscopy (EM), especially cryo-EM, three-dimensional reconstruction, X-ray crystallography,
NMR and other biochemical and biophysical approaches to study the structure, assembly and function of viruses and proteins involved in bacterial pathogenicity
Dala of all two associated decodering is not true to the first
Role of cell type-specific ER-associated degradation in polyomavirus trafficking Transcriptional Regulation of Adaptive Immunity

Discovering fundamental cellular and molecular mechanisms involved in the development of T and B lymphocytes Understanding the underlying molecular events controlling cell fate decisions within the hematopoietic system, especially within the lymphoid lineages Develop Bioinformatic resources and analyses that can be used to support the development of environmental detectors, diagnostics, animal models, vaccines, and antimicrobial drugs, as well as provide a better understanding of the molecular biology, evolution, and epidemiology of these agents. Modulators of Inflammation and Immunity Molecular genetic analysis of HCV replication, virus-host interaction, and molecular pathogenesis. Development of effective and economic therapy of infectious diseases requires thorough understanding of the biology of these infectious agents and innovative approaches to the problems Molecular-cellular interactions involved in the differentiation of B lymphocytes and epithelial cells of the mucosal immune system and the novel approaches for the induction of the humoral immune response in external secretions Mucosal vaccine development and on mechanisms involved in the induction of mucosal immune responses (including responses in the respiratory, gastrointestinal and urogenital tracts and the oral cavity) or of inflammatory responses Mucosal vaccine deevlopment Identify and characterize the outer membrane proteome of M. tuberculosis. Glycosylation of immunoglobulins in health and disease in humans (IgA nephropathy, chronic inflammatory diseases, Kawasaki syndrome) and regulation of immunoglobulin glycosylation. Viral capsids represent symmetrical nanoscale platforms that are amenable to both genetic and chemical manipulation Expertise in immune tolerance to discover why the body has trouble fighting cancerous cells Underlying structural basis by which retroviral Gag polyproteins interact with cellular constituents during the virus Mechanisms of M. tuberculosis virulence/signal transduction pathways in M. tuberculosis: Carbon Monoxide and Mycobacterium Tuberculosis Persistance in HIV/TB Coinfected; One of the first investigators at KRITH, the KwaZulu-Natal Research Institute for Tuberculosis and HIV, a new HIV-TB research center in Durban, South Africa Identifying host cell factors that are required for viral replication Structure/Function of the Bacillus anthracis Exosporium; Bacterial Gene Regulation X-ray Crystallography; Molecular Recognition; Streptococcus pneumoniae genetics and pathogenesis Understanding how the immune response combats viral infections. HIV-1 pathogenesis and vaccine developent. Design of novel strategies for immunotherapy of cancer. Brain cancer, neuropathology Mitochondrial function measurements with 31P MRS methods Adolescent sexual health: HIV/AIDs Prevention Factors that influence cervical cancer screening in HIV- infected women; Communication systems in HIV/AIDS sexual decision making in young adult females. Minority health, HIV prevention, sexual risk behaviors Women's health; gender and empowerment; stress, coping and adaptation; depressive symptoms and quality of life in the context of chronic illness; self-care and disease management; HIV-related stigma and disclosure; cognitive appraisal and the meaning of illness; peer-based social support interventions Emerging nurse researcher focused on educating the community on HIV/AIDS prevention Clinical epidemiology of HIV/AIDS in the Southeast, especially as it relates to the impact of antiretroviral therapy on HIV positive women and their infants. Investigating cognitive and behavioral interventions in older adults. He has also conducted three studies on HIV. specifically examining cognitive aging and everyday functioning in this population Methylenetetrahydrofolate Reductase (MTHFR) Polymorphism Increases the Risk of Cervical Intraepithelial Neoplasia Development of a flow-dependent in vitro blood-nerve barrier model to study pathogenic leukocyte trafficking in real time; animal models of acute and chronic demyelinating neuritis, severe murine experimental autoimmune neuritis and spontaneous autoimmune peripheral polyneuropathy. Regulation of calcitriol on TPA-induced tumorigenesis and the involvment of osteopontin in tumorigenesis P.I. for the NIAID HIVNET 024 study (Dar es Salaam, Tanzania, Lilongwe and Blantyre, Malawi; and Lusaka, Zambia) of antibiotics to prevent chorioamnionitis - related maternal to child transmission of HIV. He is P.I. Obstetrics/gynecology Ob/gyn residency program director Research and treatment of gynecologic cancers, with a particular emphasis on cervical cancer and the effects of

the human papillomavirus (HPV)

Membrane Protein Structure-Function Relationships, Cystic Fibrosis Transmembrane Regulator, X-Ray Crystallography
Prognostication of Head and Neck Cancer
T cell Regulation of Immune Responses
Cellular Life and Death Signals in Cancer, Aids and Bone Disease.
Marcha describerates
Vaccine development
All and the second of Friends
Allergy/Immunodeficiency Infectious Diseases/Kaposi's sarcoma/viral latency
Biology of herpesviruses/viral assembly and pathogenesis of CMV
Pediatric infectious diseases
CMV, mother to child transmissions Pediatrics, hemotology/oncology
Vaccines for prevention of maternal and congenital cytomegalovirus (CMV) infection
Determining ways to adequately and cost effectively provide preventive healthcare to adolescents as well as
addressing reproductive health disparities among adolescents and young adults. Impact of primary and recurrent maternal cytomegalovirus (CMV) infection in the outcome of congenital infection
Pediatrics, HIV/AIDS
Respiratory syncytial virus; antigenic diversity
Clinical trials of antiviral therapies directed against medically important viral diseases: herpes simplex virus
infection, enteroviral infections, cytomegalovirus infections, hepatitis C, and respiratory virus diseases in the immunocompromised host.
Host transcription factors exploited by HIV-1.
Role of FoxP3 in blocking transcriptional activation of HIV-LTR in T-Reg cells
Pyrimidine and purine metabolism and drug action
Biostatistical Analysis How health communication and engagement with communication technologies can be leveraged to reduce or
eliminate health disparities.
Criminal justice and substance abuse populations, including HIV + patients
HV-related stigma
Discovery of effective interventions for severe addiction
Social determinants of health, health-related quality of life (epilepsy, HIV/AIDS), spirituality/religion, minority health
Gerontology, caregiving and international social work. Mental health and addiction services, homelessness, runaway and street youth, evidence-based practice, group
interventions, GIS
Regulation of Macrophage IL-10 Production Postinjury via [beta]2 Integrin Signaling and the P38 MAP Kinase
Pathway
Molecular mechanisms of angiogenesis; transplantation biology; wound repair
Infectious Diseases
