"Informatics in Precision Medicine: When data is the drug"

**Abstract:**
Precision medicine is fundamentally data-driven medicine, which means that informatics is the unifying substrate for all aspects of precision medicine. This talk will provide a comprehensive overview of precision medicine and precision medicine at UAB, including ongoing research and clinical efforts. The focus will be on existing collaborations and opportunities for collaboration between precision medicine and informatics.

**Friday, 11/02/2018 at 10:15am**
Shelby Biomedical Research Building, Room 105
1825 University Boulevard, Birmingham, AL 35294
