

Virology (Faculty Positions)
The Department of Microbiology at NYU School of Medicine

The Department of Microbiology at NYU School of Medicine invites applications for tenure track positions at the Assistant and Associate Professor level in the area of Virology. We seek applicants with exceptional records of achievement to join our department, which is comprised of interdisciplinary faculty with expertise in bacteriology, virology, parasitology, and immunology (<http://www.med.nyu.edu/microbiology-parasitology/>). The candidate's research interests should synergize with the highly collaborative environment within the Department and throughout the NYU research community. We are particularly interested in candidates studying virus-host interactions, innate immune responses to virus infection, and viral pathogenesis, but encourage applications from all areas of Virology.

New faculty members will be supported with generous start-up packages, excellent laboratory space, access to laboratory animal facilities (including BSL3), and a wide range of state-of-the-art core facilities providing services in genomics, proteomics, RNAi, bioinformatics, cell imaging, flow cytometry, and pathology. Successful candidates are expected to initiate and maintain a vigorous, independent, extramurally funded research program, participate in the NYU School of Medicine graduate programs within the Sackler Institute and be eligible for membership in NIH-supported training programs designed to support pre- and post-doctoral trainees.

For consideration, please format an application as a single PDF document containing the following: 1) Cover letter; 2) Curriculum Vitae; 3) Brief Description of Research Accomplishments; 4) Brief description of Research Objectives; 5) Up to two key recent publications; 6) Name and contact information for 3 references. Email the application package to Microbiology.FacultyRecruitment@nyumc.org. Applications will be reviewed on a rolling basis until the search is closed on Jan 15, 2016.

Founded in 1841 and located in the heart of New York City, with its vibrant biomedical research community and unsurpassed cultural opportunities, NYU School of Medicine is an equal opportunity affirmative action employer. Women and minority candidates are strongly encouraged to apply.
