Title
Diabetes in Pregnancy: An update on the NIH Consensus Development Conference for Diagnosing GDM

Objectives
At the conclusion of this discussion the attendees should be able to meet the following objectives:

• Summarize the evidence based report on Gestational Diabetes Mellitus presented at the 2013 NIH Consensus Development Conference

• Define the terms Gestational Diabetes Mellitus and Overt Diabetes

• Identify Risk Factors for Diabetes in Pregnancy

• Explain Current Screening and Diagnosing Recommendations for Gestational Diabetes Mellitus

• Identify Risks of Hyperglycemia to the Mother and Fetus

• Describe Treatment Options Used for Gestational Diabetes Mellitus
