Women and Breast Cancer: Where are we now?

Deborah K Walker, DNP, CRNP, AOCN
Assistant Professor/Nurse Practitioner
University of AL at Birmingham School of Nursing

Session Outline

Goals: To offer an overview of current updates in breast cancer.

Objectives:

At the end of this session, participants will be able to:

1. Identify new advances in breast cancer prevention, screening and early detection.
3. Discuss breast cancer risk reduction strategies.
4. Identify different prognostic markers in breast cancer.
5. Discuss current updates in the various breast cancer treatment modalities.
6. Describe the evidence supporting currently published recommendations and clinical guidelines for breast cancer.

Key points:

i. Breast cancer prevention, screening and early detection
ii. Risk Assessment/Risk Reduction
iii. Cancer Diagnosis and Staging – Prognostic markers
iv. Treatment Modalities
v. Currently published recommendations and clinical guidelines.
