

Examples of Category A Infectious Substances

This is NOT an exhaustive list.

Microorganisms

African swine fever virus cultures

Avian paramyxovirus Type 1 - Velogenic

Newcastle disease virus cultures

Bacillus anthracis cultures

Brucella abortus, melitensis, or suis cultures

Burkholderia mallei or *pseudomallei* cultures

Chlamydia psittaci cultures - avian strains

Classical swine fever virus cultures

Clostridium botulinum cultures

Coccidioides immitis cultures

Coxiella burnetii cultures

Crimean-Congo haemorrhagic fever virus

Dengue virus cultures

Eastern equine encephalitis virus cultures

Escherichia coli, verotoxigenic cultures

Ebola virus

Flexal virus

Foot and mouth disease virus cultures

Francisella tularensis cultures

Goatpox virus cultures

Guanarito virus

Hantaan virus

Hantavirus causing haemorrhagic fever with renal syndrome

Hendra virus

Hepatitis B virus cultures

Herpes B virus cultures

Human immunodeficiency virus cultures (HIV)

Highly pathogenic avian influenza virus cultures (HPAI)

Japanese Encephalitis virus cultures

Junin virus

Kyasanur Forest disease virus

Lassa virus

Lumpy skin disease virus cultures

Machupo virus

Marburg virus

Monkeypox virus

Mycobacterium tuberculosis cultures (MTB)

Mycoplasma mycoides - Contagious bovine pleuropneumonia cultures

Nipah virus

Omsk Haemorrhagic fever virus

Peste des petits ruminants virus cultures

Poliovirus cultures

Rabies virus cultures

Rickettsia rickettsii or *prowazekii* cultures

Rift Valley fever virus cultures

Rinderpest virus cultures

Russian spring-summer encephalitis virus cultures

Sabia virus

Sheep-pox virus cultures

Shigella dysenteriae type 1 cultures

Swine vesicular disease virus cultures

Tick-borne encephalitis virus cultures

Microorganism

Variola virus (Smallpox virus)

Venezuelan equine encephalitis virus cultures (VEE)

Vesicular stomatitis virus cultures

West Nile virus cultures

Yellow fever virus cultures

Yersinia pestis cultures
