

Tuesday Tip

Change Coming for Turnitin Integration in Canvas

Turnitin Canvas legacy API (the current way for enabling Turnitin using the “check box” in assignments) **will no longer be available starting in 2017.**

The only Turnitin-supported route for integration with Canvas from January 2017 forward will be the Turnitin Canvas LTI option. To enable a Turnitin assignment in Canvas, create an assignment, select “External Tool” for Submission Type, and then select “Turnitin” from the External Tools list. We highly recommend that you start using the Turnitin Canvas LTI option when creating assignments as it offers advanced settings.

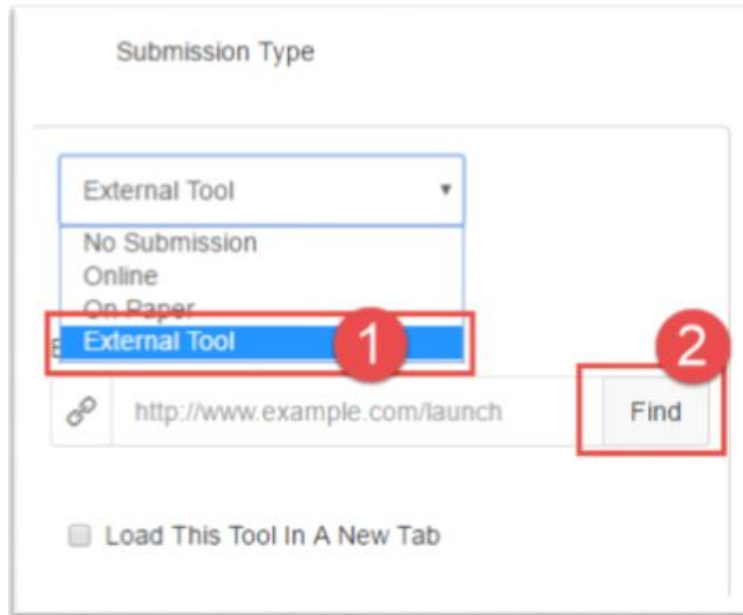

1. **Click on Assignments in course navigation**

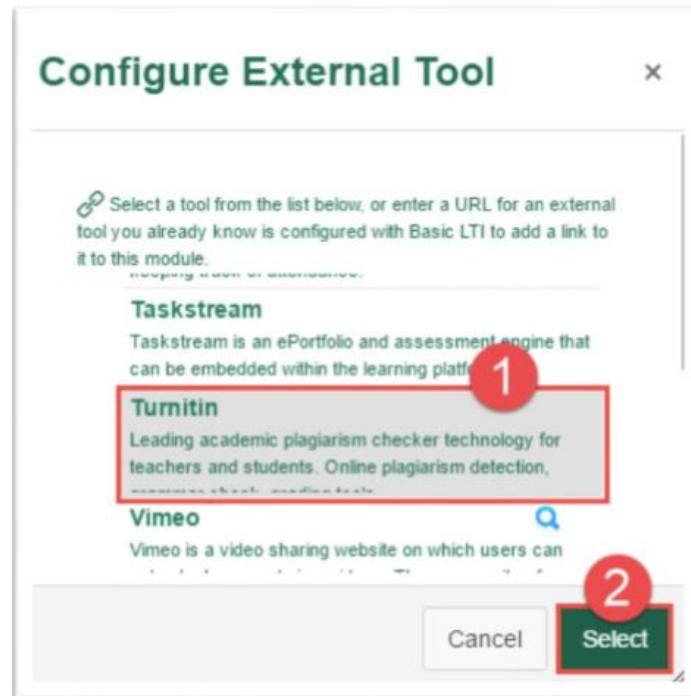

2. Select + Assignment in the top right of the window, then create your assignment as normal.

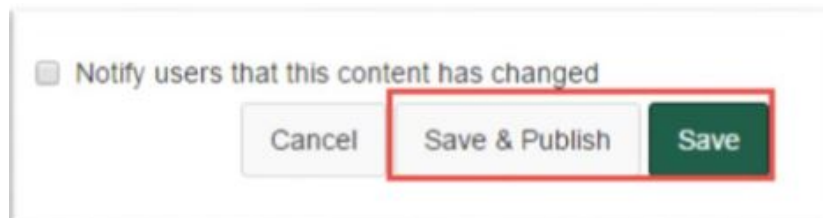

3. Under Submission Type, Select External Tool (1) then click Find (2)

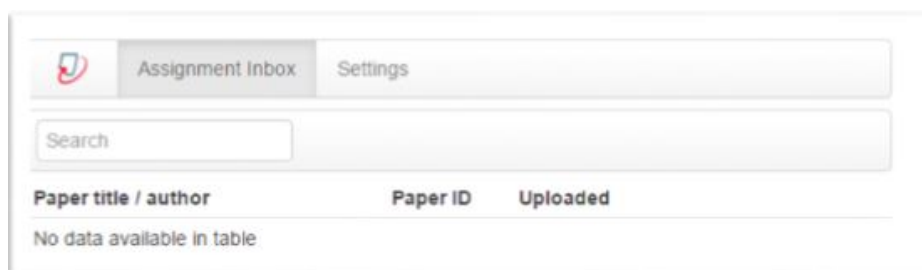

4. Find Turnitin by scrolling down. Click on it to highlight it (1) and then click Select (2)

5. At the bottom of the page, Click Save and Publish or Save.

6. You will be taken to a new screen where you can view submitted assignments as well as access settings.

7. From the settings menu, you can adjust the title, instructions, due dates and other settings. Optional settings are also available toward the bottom of the page. These include, but are not limited to late submissions, repository options, grammar checking, rubrics, etc.
