Managing Emergencies with the Incident Command System

This training program addresses OSHA 1910.120 and NFPA 472, Standard for Professional Competency of Responders to Hazardous Materials Incidents. It outlines a logical, systematic process for responding to and managing hazmat emergencies. Using problem solving workshops and table top exercises you will learn:

- Pre-planning and incident management
- Personnel assignments for emergency operations
- Assessing site safety

This course will give you an in-depth overview of the Incident Command System.
Incident Management Systems

All incidents require a coordinated effort to ensure an effective response and the efficient, safe use of resources. This course is for you if you might be involved in managing an emergency incident either as the incident commander or in supporting staff role. Responding to emergencies often requires cooperation among several agencies. Unified command will be addressed in this course.

Date: August 5 & 6, 2003
Time: 8:30 a.m.—4:30 p.m.
Location: UAB CLEAR
1044 11th Street South
Fee: $325 per person
$290 per person for groups of 15 or more

Registration: Call 205.934.8016
Fax 205.975.6247
Mail 1043 Bldg 102
1530 3rd Ave S
