WHAT IS A CARE TEAM?
A Care Team is a group of volunteers working together to provide practical, emotional, and spiritual support to individuals and families with health concerns or other special needs.

This conference will focus on how to develop Care Teams for seniors, persons with disabilities, and any other special needs.

Care Teams have been developed for the elderly, persons with Alzheimer’s disease, cancer, heart disease/stroke, HIV/AIDS, Multiple Sclerosis, Parkinson’s disease, children with special needs, persons with disabilities, and dozens of other life situations.

A team approach is a practical way for individuals to work together to share the care to make a difference in the lives of others.

WHAT DOES A CARE TEAM DO?
A team’s activities may include transportation to the doctor or grocery store, household or yard chores.

Some people enjoy running errands, preparing meals, or providing social outings. Others prefer to visit, make phone calls, or provide a break for caregivers.

Team members simply do what they enjoy doing for others, when they are able, in an organized way with a built-in support system.
