UAB engineering students successfully completed their flight experiment last week. Here are some pictures on the NASA website.

4/6/06, UAB Flight Group 1: David Scott (2nd from right) and Blake Wallace (3rd from right) are boarding the plane.

Blake (right) are using the computer mouse as David is setting thing up.
As the computer recording images and data of the experiment, we have time for a picture.

Job well done.
4/7/06 UAB Flight Group 2, Wendy (2nd from right), and Andrew (3rd from right) looked anxious as they boarded the place.

Chip (center) also has a serious look on his face.
Perfect, thank to the hard work in the design and building of the experimental hardware.

You can only make this hair style in zero-G.
