INSTRUCTIONS - SOCIETY FOR PEDIATRIC UROLOGY RESEARCH GRANT
PROGRAM 2004 – 2005

Please read the application thoroughly. Any questions regarding the award and criteria should be directed to Deborah Glidden, assistant to Dr. John W. Brock, III, M.D., at Deborah.glidden@vanderbilt.edu.

1. The application must come from a Society for Pediatric Urology (SPU) member or be sponsored by an SPU member.

2. Deadline for submission is March 1, 2005. Applications received after this date will not be considered.

Deadline and Review Process

Applications and all supporting documents for Research Grants must be received no later than March 1, 2005. Applications received after this date will not be considered. Applications will be reviewed by the Research Grant Council. Successful applicants will be notified and funds made available to them at the 2005 SPU Annual Meeting, which will be held on Saturday, May 21, 2005, at the Marriott Riverwalk Hotel in San Antonio, Texas. Because of limited resources, the SPU is not able to provide written critiques of applications.

Terms of Support

Support will be provided for one year in the total amount not to exceed $30,000. Funds provided by a SPU Research Grant will be administered by the appropriate fiscal department of the investigator’s institution. Funds may be used only for technician salary, equipment, supplies, animals, clinical research costs or other expenses directly related to the conduit of the proposed research. Up to $500 may be used for travel by the investigator to national or international meetings. Funds for a SPU Research Grant may not be used for any of the following:

1. Salary or fringe benefits for the investigator or collaborating investigators

2. Indirect costs or overhead

3. Costs of patient care

4. Constructing or renovating facilities

5. Furniture or office equipment

6. Secretarial services

7. Honoraria or membership dues

8. Textbooks or periodicals

9. Repair or service contract costs on institutional equipment

10. Entertainment

Other Support

The Society for Pediatric Urology anticipates that investigators who have or successfully compete for funds from other agencies will not require support by a SPU Research Grant. If, during the period of support by a Research Grant, the investigator obtains funding for any research project of greater dollar amount from a source outside the investigator’s institution
(such as the National Institutes of Health, Veterans Administration or a philanthropic group), the Research Grant will be terminated at the start of funding by the other agency. Awards which are explicitly limited to salary support for the investigator or other faculty are excluded from this restriction. To assist the SPU Research Grant Committee in implementing this policy, the application should include copies of all letters of award for research projects in which the applicant is or will be participating.

Application

The Application Form contains two Sections.

Section 1 consists of two (2) pages to be completed by the applicant.

Section 2 is found on page 3 of the Application and is a list of required information and attachments, including the Principal Investigator’s CV and an Abstract of the Research Plan. The Research Plan should be divided into the following Parts:

Part A. Specific Aims (limited to one page)

Part B. Significance and Background (limited to three pages)

Part C. Preliminary Studies (limited to six pages)

Part D. Experimental Design and Methods (limited to seven pages)

Part E. References

Part F. Personal Statement (limited to one page)

Part G. Appendix

The page limitations for the different Parts of the Research Plan are the maximum acceptable. Conciseness of description is desirable and fewer pages than the maximum allowable will usually be sufficient for Parts C and D. Section 2 should be submitted as a Word document using 11-point proportional font as the smallest print permitted. There must be no more than 60 lines per page. Your application may be denied scientific review if it exceeds required number of pages or permitted type size. An Appendix may be used for presenting data tabulation, figures, graphs, submitted manuscripts, abstracts and papers. Any Appendix should not contain further descriptive material.

Statements must accompany the application demonstrating that the appropriate reviews have been obtained by human subjects, animal care or other committees of the institution.

Institutional Commitment

A letter of commitment from the Chairman of the applicant’s department must be submitted with the application for a SPU Research Grant.
