Teaching with Vista: an online course  
Hosted by UAB’s Instructional Technology Department

OVERVIEW

Online Course
This is a comprehensive online course designed to build instructors’ skills from the perspective of teaching and managing their Vista courses.

During this course, faculty will learn how to leverage the new communication, assessment, assignment, management, and selective release features found in WebCT Vista. Faculty will identify practical strategies and techniques for teaching online and expand their knowledge of WebCT Vista by exploring common tasks and day-to-day challenges.

- Managing/Evaluating Assignments
- Managing/Evaluating Assessments
- Using the Grade Book
- Customizing Content Delivery
- Monitoring Student Performance
- Building Learning Communities

Instructional Goal:
This online course focuses on the instructor’s role in facilitating learning using the Vista course management system.

WHO SHOULD ENROLL
Faculty who plan to use WebCT Vista for teaching online or enhancing a face-to-face course. The curriculum focuses on the section instructor role.

Instructional Technology at UAB
Creating learning environments that extend beyond the traditional classroom

Our purpose is to provide a technology-supported education system and the services that contribute to the strategic mission of the University, to the quality of education, and to the learning outcomes of UAB staff and students. We support a blended approach to teaching and learning.
