2013 National Cyber Security Awareness Month
Example: 3 of 12 posters used in awareness campaign

YOU ARE THE TARGET
Your accounts, computers and devices have tremendous value to cyber criminals. The first step to protecting yourself is understanding that you are under attack.

PASSWORDS
Your passwords are the keys to your kingdom, guard them well.

Never share your passwords.
Use different passwords for different accounts.
Use passwords that are hard to guess.

USE EMAIL SAFELY
Email is the number one method cyber criminals use to attack their victims.
Be suspicious of odd emails or emails that seem too good to be true.
