

# MA418 Intro to Statistics

Fall 2021

## COURSE DESCRIPTION

This course supports the development of quantitative literacy. As such, the course is about learning the concepts and principles of statistics and then being able to choose among various statistical methods when presented with a brand-new problem. The actual calculations required in applying statistical methods is done using a calculator or computer program.

## COURSE MATERIALS

### Access Code

The MyMathLab access code for the course is required and is available through Canvas with the First Day access unless you opt out. Access is also available for purchase at the bookstore, but more expensive. There is no textbook for the course, eText is included with the Access Code.

### Formula Sheet

The formula sheet is allowed to be used during testing and is located in MyMathLab. It is recommended to use the formula sheet during class and lab meetings as well as for assignments.

### Calculator

A good calculator can be useful, but is not required for the course. Students can use StatCrunch, which is included with MyMathLabPlus or Excel for computations.

## COURSE CONTENT

- Handle data sets, construct and interpret tables, graphs, and schematic representations of mathematical relations
- Translate verbal descriptions into mathematical form
- Compute statistics and evaluate the significance of observations
- Probability laws and empirical data
- Measures of center and variability
- Normal distributions
- Sampling distributions
- Hypothesis testing and confidence intervals
- Linear regression analysis
- Analysis of categorical data
- One-way analysis of variance

## COURSE OBJECTIVES

1. Recognize and analyze sampling methods and the importance collecting data.
2. Develop the ability to organize, summarize, and represent data in ways that enable us to see important characteristics.
3. Apply methods of descriptive statistics to summarize or describe relevant characteristics of data.
4. Collect sample data gathered in the community and analyze it using summary statistics.
5. Identify, interpret, and calculate probability values.
6. Select and use discrete or continuous probability distributions.
7. Apply basic methods for hypothesis testing to a collected data set and interpret the results to create possible further actions.
8. Use basic methods of testing claims about population parameters by selecting sample data to estimate values of population parameters as well as conducting tests about population parameters.
9. Analyze paired data to determine correlation and identify a linear regression equation to predict values.
10. Use statistical methods for analyzing categorical data that are separable into different cells.
11. Identify and apply methods of one-way analysis of variance to conduct a hypothesis tests.

## COURSE ACCESS

### Canvas

All additional course materials as well as deadlines will be in Canvas. Official communication will be done through Canvas announcements or in person. Canvas will be used to access online assignments in MyMathLab, as well as the lecture notes used during class meetings.

### MyMathLab

All previews, homeworks, quizzes, and tests for this course are available in MyMathLab only. A user account is required for every student and needs to be activated through Canvas. You won't need an access code unless you opt out of the First Day access provided at a reduced cost. Instructions can be found under Course Information.

NO EXTENSIONS for missed assignments due to failure to activate your account or opt out of First Day access.

### Browser

It is recommended to use Mozilla Firefox or Google Chrome to avoid any browser issues with Canvas or MyMathLab.

## COURSE GRADE

Your grade in the course is determined by the points earned throughout the semester and a Pass/Fail project.

Assignments	Points
Preview (10 quizzes @ 5 points each)	50
Homework(10 assignments @ 10 points each)	100
Quizzes (10 quizzes @ 10 points each)	100
Tests (4 tests @ 100 points each)	400
Final Exam	250
Problems (10 @ 10 points each)	100
<b>Total points possible</b>	<b>1000</b>
Syllabus Quiz	5
Bonus Reflection	20

Points earned	Grade
880-1000	A
750-879	B
620-749	C
500-619	D
Below 500	F

### Preview

There is a Preview Assignments that is required before you can attempt the weekly Homework Assignments. It is important to work through them to gain the basic understanding needed for the remaining assignments that they go with. It serves as an introduction for new concepts and is completed in MyMathLab. No credit will be given for late completions.

### Homework

The homework exercises are done using a computer program named MyMathLab. Homework assignments must be completed no later than 11:59 PM on the day specified in your course schedule to receive full credit. Any work submitted after the deadline will receive half-credit automatically.

### Quizzes

Like the homework, quizzes are taken on-line. Each quiz can be taken two times (the highest grade will count). **Do not hit the BACK button on your browser when taking a quiz.** This will end your quiz and you will not be able to get back into it. If you think your computer or network connection is not reliable, you should take your quizzes in the UAB Math Learning Lab (if available). Quizzes have a 30-minute time limit. They are open-book. **Students are strongly advised to not wait until the last minute to complete practice and quizzes.** Problems occurring at the last minute are the responsibility of the student. Quizzes must be completed no later than 11:59 PM on the day specified in your course schedule to receive full credit. Any work submitted after the deadline will receive half-credit automatically.

### Tests/ Final Exam

There will be four 60-minute tests and a 120-minute final exam. The final exam will be comprehensive. The tests and final exam can all be completed with reference to the formula sheet provided in MyMathLab. The textbook itself cannot be used. You can use your calculator or StatCrunch/Excel during testing, but no other resources. Students found using anything besides the permitted items during testing will receive a zero on the test. **All testing will be completed in HHB 202 during lab time on the scheduled days.**

### Preparing for Tests

The way you prepare for the tests in the course is by completing all of the assignments in the course. Test questions will be similar to questions seen in the Homework and Quiz assignments throughout the semester. You should complete these assignments for understanding to ensure the best preparation for the tests. You also have access to Practice Tests that can be used to prepare for the test, which will not be for credit.

### Make-ups

There are no make-ups for missed homework and quiz assignments. This is because they can and **should be completed ahead of time**. However, you can complete the assignments late for half credit.

- **If a student misses 1 test** (not including the Final Exam), the Final Exam grade will be used to replace the missed test grade if the student formally makes a request to do so. The student must complete a **Replacement Test Grade** form no later than 12:00pm on the last day of classes at UH 4005. **Note that only one missed test grade may be replaced with the Final Exam grade. All students are expected to take the Final Exam.**
- *A student missing a test due to university related business or government mandated activities is required to notify the instructor **no later than one week prior to the missed test date in order to be able to take the test prior to the scheduled test date.** If a student does not communicate with the instructor one week prior to the missed test date, the student will be required to use the Final Exam grade to replace the missed test grade.*

### Problems

Weekly group problems will be completed during the assigned lab days in HHB 202 as can be seen on the schedule. Each student is accountable for their individual submission and answers should not be copied from members of the group.

### Syllabus Quiz

The Syllabus Quiz will be completed to ensure that you have read and understand the contents of this document. It will contain important aspects of the course and its structure. By completing it, you certify that you have read and understand the syllabus.

### Bonus Points

There will be an opportunity at the end of the semester for you to complete an assignment for up to 20 Bonus Points. The assignment will be submitted in Canvas.

### Project

As a 418 student, you will have an additional project to complete. It will be graded as Pass/Fail. If you receive a Fail, your course grade will automatically be lowered by a whole letter grade. The work for the project will be submitted in Canvas and you will have a couple opportunities throughout the semester to submit preliminary work and receive feedback.

## COURSE POLICIES

### Cell phones and other electronics

All cell phones, tablets, and other electronic devices must be turned off and put away during testing. Violations will result in penalties determined by the director of Pre-Calculus Curriculum and can result in a grade of F in the course.

## Grade Review

Official student grades are maintained in the Math Department grade database (a.k.a. MADDIE). To access your grade record, go to [www.uab.edu/mathematics](http://www.uab.edu/mathematics) and click on *Student Resources* then *Check grades*. You will need to enter your BlazerID and password. You can also access it through Canvas under *UAB Grade for MA 180/418*.

Students are asked to review all grades for accuracy immediately after they are posted. **All questions involving homework grades, quiz grades, test grades and participation points must be resolved before the final exam.** Once the final exam is taken the course is complete, and no further review of in-term grades is permitted.

## Tutoring

Please visit Resources on the Math Department website and see the times for MA 180 at <https://www.uab.edu/cas/mathematics/resources>.

## Email

Information about the course (changes to assignments, reminders, schedules, etc.) will be distributed to students using their [BlazerID](#) email address or Canvas. Each student is required to access their UAB email account daily, as these communications represent official university business. This is a requirement for all UAB students. For UAB email account assistance, send an email to [userservices@uab.edu](mailto:userservices@uab.edu), or call 934-3540.

## Extended Absences

Attendance is fundamental to course objectives and to the integrity of this course. Courses in the Mathematics Department require a variety of activities that involve interaction with the instructor and/or interaction with other students. Excessive absences and missed assignments (more than 2 weeks) seriously jeopardize a student's ability to successfully complete the course. In the event of excessive absences, students should be prepared to officially withdraw from the course through the Registrar's Office. In cases involving medical hardships, military duty, or other serious personal situations after the withdrawal date for a course, the student may participate in the Academic Policy Appeal (accessed and submitted through Blazernet Links/Forms).

## Disability support Services (DSS)

UAB is committed to providing an accessible learning experience for all students. If you are a student with a disability that qualifies under Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act, and you require accommodations, please contact Disability Support Services for information on accommodations, registration and procedures. If you are registered with Disability Support Services, please contact DSS to discuss accommodations that may be necessary in this course. Disability Support Services can be reached at 934-4205 or [www.uab.edu/dss](http://www.uab.edu/dss) or in the Hill Center Suite 409.

## Title IX Statement

UAB is committed to providing an environment that is free from sexual misconduct, which includes gender-based assault, harassment, exploitation, dating and domestic violence, stalking, as well as discrimination based on sex, sexual orientation, gender identity, and gender expression. If you have experienced any of the aforementioned conduct we encourage you to report the incident. For more information about Title IX, policy, reporting, protections, resources and supports, please visit <http://www.uab.edu/titleix> for UAB's Title IX Policy, UAB's Equal Opportunity, AntiHarassment Policy and Duty to Report and Non-Retaliation Policy.

**Academic Misconduct**

UAB Faculty expects all members of its academic community to function according to the highest ethical and professional standards. You are expected to be aware of, and rigorously adhere to, the UAB code of conduct with regard to academic honesty and inter-personal relations.

Academic dishonesty and misconduct includes, but is not limited to, acts of abetting, cheating, plagiarism, copying homework, fabrication, and misrepresentation. Candidates are expected to honor the UAB Academic Code of Conduct as detailed in the most current *UAB Student Catalog*.

**Add/Drop and Course Withdrawal**

Drop/Add: Deadlines for adding, dropping, or withdrawing from a course and for paying tuition are published in the [Academic Calendar](#) available online. Review the [Institutional Refund Policy](#) for information on refunds for dropped courses.

Withdrawal: To avoid academic penalty, a student must withdraw from a course by the withdrawal deadline shown in the academic calendar and receive a grade of W (withdrawn). Failure to attend class does not constitute a formal drop or withdrawal.

**Syllabus:** This syllabus is subject to changes announced in class.
