

Department of Mathematics

MA 472/572-2D

Syllabus: Geometry I

Fall 2021

Instructor: Dr. John C. Mayer

Contact Information: jcmayer@uab.edu Department Telephone: 934-2154

Preferred Methods of Contact: Email is the preferred method of contact if you have questions. Please expect a response within 24 hours on weekdays and a slower response on weekends. I will expect the same of you. Include MA 472-2D in the subject line of your email for a faster response. I am available to meet with you virtually via Zoom by appointment or during my virtual office hours (see below).

Office (UH 4022 or Zoom):

Hours: Monday/Wednesday 4:00-5:00 PM **Zoom Contact:** 939-460-2319

Instructional Method:

Remote and In-Person: This class will be conducted using a combination of in-person class meetings, virtual class meetings on Zoom (mainly for group work sessions if social distancing is required), and recorded content through Canvas, Zoom, and other tools using the Canvas Learning Management system. Check course Canvas page often for announcements and assignments. Students should reserve the days and hours listed in the Class Schedule for in-person classes and online synchronous course elements, as determined by the instructor.

Time Commitment. This class meets twice per week for 1.25 hours each. In addition to our class meeting time (in-person and virtual), you should spend about 6 hours per week reading, studying, preparing for class discussions, and completing assignments.

E-Learning Student Support. For help with REMOTE technologies:
<https://www.uab.edu/elearning/students>

Course Information:

Course Number and Title: MA 472/572-2D – Geometry I

Class Meeting Times: Tuesday/Thursday 12:30 – 1:45 PM

Course Description:

This course is a “guided inquiry” course. That is, your textbook will consist of statements of definitions, axioms, problems, and theorems, and occasional brief explanations. There will be very little lecture. You will be expected to solve the problems and prove the theorems yourself, individual and in small groups. Small group assignments are at the instructor’s discretion, and may be random. Individual and group work will be “processed” by the class as a whole. Processing involves whole class discussion of the problem or theorem, usually based upon one or more student presentations to the class. Competence in oral and written communication of mathematics is a major goal of the course.

In a guided inquiry course, when you are working individually or in a group, you are expected NOT to consult outside sources such as other geometry textbooks, internet websites, smarter friends, friendly

dogs, or the like. You may work with other students in the class, but if you present work done in part by others, you must give credit to all who participated in the work. (For example, you might say “Ann and I worked together on this.”) This will not diminish your credit, but is required by academic honesty. Moreover, your collaborators are not required to bail you out of difficulty, but may elect to do so.

Course Objectives:

We will cover the following topics:

1. Congruence and geometric constructions.
2. Introduction to axioms, theorems, and proofs.
3. Area measure and theorems.
4. Angle measure and theorems.
5. Similarity, trigonometry, and circle measure, as time permits.

Learning Outcomes. Students will

1. Articulate understanding of congruence, transformations, and isometries.
2. Undertake geometric constructions using ruler and compass.
3. Articulate understanding of basic axioms, theorems, and proofs about congruence of triangles and other plane figures.
4. Articulate understanding of parallel lines and of the measure of area.
5. Articulate understanding of the Pythagorean theorem and the measure of angles.
6. Graduate (MA 572) and Extra Credit: Articulate awareness of similarity, trigonometry, and circle measure.

Prerequisite: MA 125 – Calculus I

Required Text and Course Materials:

There is a required textbook for this course: David Clark, *Euclidean Geometry, A Guided Inquiry Approach*. During every class you should have available the following items.

1. Your textbook.
2. A 3-ring binder containing your class Notebook, everything up to date.
3. Straightedge (ruler) and compass.
4. Sharp pencils or pens, colors are useful.

You will need a few sheets of tracing paper or clear plastic that you can draw on. You will need a scanning app on your smart phone or computer in order to submit PDF copies of work done for assignments and presentations. Adobe Scan is free: <https://acrobat.adobe.com/us/en/mobile/scanner-app.html>

Zoom Etiquette: Please observe the following “rules of the road” for any Zoom meetings:

- Be prepared to enter class from our course Canvas Zoom page a few minutes before the scheduled time (in order to provide time to enter from the waiting room).
- Have video ON at all times. Stay in the frame, particularly when taking a quiz or test. (You may turn video off briefly, if leaving the frame for personal reasons.)
- Have audio MUTED unless you are in an active discussion (in order to minimize distracting noises).UAB Policies and Resources:

Add/Drop and Course Withdrawal

- Drop/Add: Deadlines for adding, dropping, or withdrawing from a course and for paying tuition are published in the [Academic Calendar](#) available online. Review the [Institutional Refund Policy](#) for information on refunds for dropped courses.

- **Withdrawal:** To avoid academic penalty, a student must withdraw from a course by the withdrawal deadline shown in the academic calendar and receive a grade of W (withdrawn). Failure to attend class does not constitute a formal drop or withdrawal.

UAB United: Safe Entry to Campus during COVID Pandemic

- Please go to the [UAB United website](#) for guidance and resources related to our safe entry to campus in Fall 2021
- **Mandatory Masks and Social Distancing Requirements:** In accordance with CDC guidelines and for the health and wellbeing of all faculty, staff and students, students, faculty and staff are currently required to wear cloth face coverings or facemasks at all times indoors (per UAB and CDC guidelines) while on the UAB campus. These requirements may be updated from time to time.
- Non-compliance with the required items will result in students not being able to remain on campus or participate in any in-person classes, meetings, jobs, extracurricular activities, and events.
- We strongly urge you to be fully vaccinated. [Here is information on getting a vaccine and vaccine safety.](#)

Misconduct:

The University of Alabama at Birmingham expects all members of its academic community to function according to the highest ethical and professional standards. Students, faculty, and the administration of the institution must be involved to ensure this quality of academic conduct. Review the Academic Honor Code and Non-Academic Student Code of Conduct linked below.

- [Academic Integrity Code](#)
- [Non-Academic Student Code of Conduct](#)

DSS Accessibility Statement: UAB is committed to providing an accessible learning experience for all students. If you are a student with a disability that qualifies under Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act, and you require accommodations, please contact Disability Support Services for information on accommodations, registration and procedures. UAB Disability Support Services (DSS) has established a process for UAB students to request temporary adjustments based on the impact of COVID-19. Requests for reasonable accommodations involve an interactive process and consist of a collaborative effort among the student, DSS, faculty and staff. If you are registered with Disability Support Services, please contact DSS to discuss accommodations that may be necessary in this course. If you have a disability but have not contacted Disability Support Services, please call (205) 934-4205, visit [their website](#), or their office located in Hill Student Center Suite 409.

Title IX Statement: The University of Alabama at Birmingham is committed to providing an environment that is free from sexual misconduct, which includes gender-based assault, harassment, exploitation, dating and domestic violence, stalking, as well as discrimination based on sex, sexual orientation, gender identity, and gender expression. If you have experienced any of the aforementioned conduct we encourage you to report the incident. UAB provides several avenues for reporting. For more information about Title IX, policy, reporting, protections, resources and supports, please visit [UAB Title IX webpage](#) for UAB's Title IX, UAB's Equal Opportunity, Anti-Harassment, Duty to Report, and Non-Retaliation policies.

Course Grading:

Course Grades. Students earn their grade in the course as determined in the tables below. How each grade component is determined is described in the paragraphs that follow. Points accumulated will be recorded in CANVAS within one week of the completion of the assignment or activity. Important due dates will be listed in CANVAS calendar. Recall that a grade of **D** cannot count toward the mathematics major.

Grade Element	Points		Points Earned	Course Grade
In-Class Quizzes	100		400 points or more	A
Canvas e-Quizzes	50		350-399 points	B
Participation	100		300-349 points	C
Assignments	100		250-299 points	D
Final Exam	100		Below 250 points	F
Total	450			

Pass/Fail option. A Pass/Fail option is not presently anticipated for this class, but COVID mitigation may cause this to change.

Late Assignment Policy: Assignments no more than one class meeting late will be subject to a 10% grade penalty. Assignments more than one class meeting late are subject to greater penalty at the discretion of the instructor.

Participation. You are expected to participate actively, particularly in small group work and class processing discussions. Mere presence does not constitute ACTIVE participation. Participation points are awarded as in the following table. Note that it is possible to earn MORE than 100 points total for the semester since we will have about 29 class meetings. Points earned beyond 100 are extra credit. Priority in presenting goes to students with the fewest Participation points.

Level of Participation	Points
Be present in class	1
Make minimal presentation or contribute meaningfully to class/group discussion	2
Contribute significantly to class discussion	3
Make good presentation (substantially correct)	4
Make excellent presentation (completely correct)	5

Assignments. After certain problems and theorems are presented in class, you will be required to turn in your written solution/proof of designated problems/theorems as an Assignment in Canvas. This is intended to verify your understanding of the solution or proof after it has been presented to the class as a whole. You must draw your own figures and write out the solutions/proofs in your own words, though you may follow the solution as presented in class. Assignments count 10 points each, unless otherwise stated.

Tests and Quizzes.

There are three categories of tests and quizzes. All quizzes and tests are open book: you can use the textbook or your Notebook, but you may not consult any other sources.

- 1. Canvas e-quizzes:** Canvas e-quizzes must be completed prior to each class meeting. Typically, an e-quiz will be three or four short-answer or multiple choice questions. The purpose of this quiz is so that you will have done some work on new material prior to class. Each e-quiz counts 3-4 points. It is possible to earn more than 50 points; points beyond 50 are extra credit.
- 2. In-Class Quizzes:** quizzes will be given in class without prior announcement, and based primarily upon work done within the current and one or two prior class meetings. Quizzes will be of a similar nature to the types of problems, examples, constructions, and theorems encountered in class and in working through the textbook. Each quiz counts 10 points unless specified otherwise at the time. No tests take a full class period, usually just 20 minutes or so.

3. Final Exam: The final examination will consist of a number of problems similar to the major problems and theorems of the course, but not repeating problems in the course. You will be able to select a small number of problems to work on from a longer list. The final exam counts 100 points.

Make-Up Policy. There are no make-up quizzes or presentations for absences resulting in decreased participation or quiz credit. If you miss a class for a verifiable emergency or illness, necessary medical appointment, or on UAB official business, the instructor will work with you to find an accommodation.

Scoring Rubric (10 Point Scale)

	Conceptual Understanding: <i>Interpreting the concepts of the task and translating them into mathematics</i> <i>(Identifying the “core” of the problem)</i>	Evidence Of Problem Solving: <i>The use of task-appropriate tools and problem solving strategies.</i>	Explanation: <i>Using verbal reasoning and appropriate constructions to best convey the solution.</i> <i>(The explanation flows smoothly.)</i>	Accuracy: <i>Providing a wholly justified solution for the task at hand.</i>
3			Explanation is coherent, and the ideas involved follow logically from previously stated ones.	The solution is completely justified, with no gaps in the argument.
2	Student’s work has demonstrated that he/she has fully identified the major concepts of the task.	The student’s work has demonstrated the strategic use of all task-appropriate tools and problem solving methods.	Explanation is not sufficiently rigorous or something may not immediately follow from what is written.	The solution has one or two minor gaps in justification.
1	Some, but not all, of the major concepts needed were evident.	Not all tools needed for the task are used or the tools are not used in a manner appropriate for solving the problem.	Explanation has multiple gaps or multiple steps need to be inferred.	The solution has major gaps in the justification.
0	Does not achieve minimal requirements for 1 point	Does not achieve minimal requirements for 1 point	Does not achieve minimal requirements for 1 point	Does not achieve minimal requirements for 1 point

This rubric is applied to assignments and to test and quiz questions.

Rules for Group Work

1. Each member takes responsibility for his/her own learning.
2. Each member of the group is willing to help every other group member who asks for help.
3. Groups may ask the teacher for help only when all group members have the same question.
4. There is always a further challenge.

These rules apply during all small group discussions. Whole group discussions require adherence to the standard rule of classroom engagement: speak and listen respectfully.

Course Netiquette:

There are course expectations concerning etiquette on how we should treat each other online. It is very important that we consider the following values during online discussions, Zoom interactions, and email.

- **Respect:** Each student's opinion is valued as an opinion. When responding to a person during the online discussions, be sure to state an opposing opinion in a diplomatic way. Do not insult the person or their idea. Do not use negative or inappropriate language.
- **Confidentiality:** When discussing topics be sure to be discreet on how you discuss children, teachers, and colleagues. Do not use names of people or names of facilities.
- **Format:** When posting use proper grammar, spelling, and complete sentences. Avoid using ALL CAPITALS. This signifies that you are yelling. Avoid using shortcuts/text abbreviations such as 'cu l8r' for 'See you later.'
- **Relevance:** Think before you type. Keep posts relevant to the discussion topic.

Notebook Requirement.

Both work done in class, in small groups, and individually, and any notes you take based upon whole group discussion or lecture, will be kept in your permanent class Notebook (loose-leaf 3-ring binder). Your Notebook should contain the following sections:

1. **Finished work:** work you have completed and which has been presented (by you or someone else) in class.
2. **Work in Progress:** work you have attempted and/or prepared to present
3. **Graded Assignments.**
4. **Graded Quizzes.**
5. **Class Discussion and Lecture Notes.**

Attention to keeping an up-to-date Notebook will greatly improve your work over the semester.

MA 572 Students Only. MA 572 is scheduled with MA 472 and MA 572 students participate in all class activities described above without distinction being made between students. However, MA 572 students have an additional requirement: a 5-10 page mathematical expository paper on some aspect of advanced (beyond undergraduate course topics) Euclidean or non-Euclidean geometry (for example, similarity, trigonometry, or circle measure). Discuss your topic selection with the instructor well in advance. This is the one case where you can consult other sources. The paper counts an additional 50 points toward your final grade, for a total of 500 points (to which the grade table here is applied). Students in graduate courses cannot receive a grade of **D** in the course, so any grade below 350 points is an **F**.

Points Earned	Course Grade
450 points or more	A
400-449 points	B
350-399 points	C
Below 350 points	F
