

UNIVERSITY OF ALABAMA AT BIRMINGHAM
MA 102 (QL)
COURSE SYLLABUS

Term: Spring 2020

Section: QL

Instructor: Caren Alexander

Instructor email: caren12@uab.edu

Instructor office hours: Available upon request

Instructor phone: Department of Mathematics, 205-934-2154

Students in this course are required to complete the following tasks by Friday, January 17th 2020:

- Activate their MyMathLabPlus accounts **AND**
- Post in the Introduction Discussion **AND**
- Complete the Honor Code

Failure to complete **ALL** of these tasks may result in administrative withdrawal from the course.

Students adding the course after the first day of class are responsible for contacting the instructor within 24 hours of enrollment.

WITHDRAWAL - The last day to drop this course without the payment of full tuition and fees is January 21, 2020. The last day to withdraw from this course with a grade of *W* is March 13, 2020.

NOTE: For Course Syllabi posted prior to the beginning of the term, the Course Instructor reserves the right to make changes prior to or during the term. The Course Instructor will notify students, via email or Canvas Announcement, when changes are made in the requirements and/or grading of the course.

PREREQUISITES - "C" or better in MA 096, Ma097, or MA 098, or "P" in MA 098. Or, beginning freshmen meet Math Screening requirements (see ACT Math Subscore/GPA Grid in the latest on-line UAB Class Schedule). Transfer students must have an appropriate score on the Advanced Screening Test in order to be eligible for MA 102.

Learning Outcomes:

- Students can solve linear equations and inequalities in one variable, can solve absolute value equations and inequalities, and can use interval notation and the real number line for describing solution sets. Students can graph linear equations in two variables, and are able to recognize and use the equation of a straight line in different forms.
- Students can use the slope to identify parallel or perpendicular lines, can solve linear systems of two equations algebraically and by graphing lines, and can use linear systems of two equations to solve a variety of verbal problems.
- Students can perform arithmetic operations on polynomial expressions, factor polynomials, and solve polynomial equations by factoring. Students know that solving polynomial equations of higher degree is intrinsically difficult.
- Students can identify rational expressions and functions and their domains, can multiply, divide, add, and subtract rational expressions, simplify complex fractions, and solve rational equations.
- Students know the rules of exponents and can apply them to simplify expressions involving positive and negative rational exponents. Students are able to combine, multiply and divide radical expressions and solve radical equations.
- Students are able to solve quadratic equations by factoring, by the square root method, by completing the square, and by using the quadratic formula. Students can interpret square roots of negative numbers as complex numbers and perform arithmetic operations on complex numbers.
- Students can create, interpret, and use linear, polynomial, and rational models to solve problems in a variety of application areas.

Course Description: (3 semester hours). Absolute values. Cartesian coordinates. Graphs of equations. Concept of a function. Function notation. Lines. Linear systems. Word problems with linear models. Algebra of polynomials. Factoring of polynomials. Polynomial Division. Algebra of fractional expressions. Literal equations. Rational equations. Word problems with rational models. Integer and rational exponents. Algebra of radical expressions. Radical equations. Complex numbers. Introduction to quadratic functions. Quadratic equations.

This course is about developing quantitative reasoning ability as well as acquiring specific mathematical skills (algebra, arithmetic, etc.). The above learning outcomes are realized in the course with a variety of learning opportunities (group work, video lecture, and computer-aided instruction)

MATERIALS:

Intermediate Algebra MA 102 package, which includes a UAB Math 102 Student Workbook, by Elena Kravchuk, Pearson/Prentice Hall, and MyMathLabPlus ACCESS CODE, is recommended. You must purchase a course ACCESS CODE unless you are repeating the course and the same online textbook is being used.

ALL students MUST PURCHASE a MyMathLab PLUS ACCESS CODE. NO EXTENSIONS of deadlines are given due to failure to purchase the required materials.

Calculator: During testing, only the computer desktop calculator may be used and no graphing or handheld calculators are allowed.

Whiteboard: For testing, you will be required to use an 8.5" x 11" whiteboard to work out problems. Paper will not be permitted.

Access for a course in MyMathLab Plus:

All Homework, Quizzes, and Tests for this course are available only in MyMathLab Plus. A MyMathLab Plus account has already been established for you and must be activated.

- Log in to **BlazerNet** and click on the MyMathLab Plus link.
- Click on your course.
- Choose one of the following:
 - o Access Code (enter your printed code)
 - o Buy Now (credit card required)
 - o Pay Later (allows temporary access, good for only 14 days, no extensions when it expires)*

***Once Pay Later (Temporary Access) has expired, you will be prompted to choose Access Code or Buy Now. You will no longer have access to your course materials and assignments in MyMathLab Plus until you enter your code or purchase it.** Please note that there will be **NO EXTENSIONS for missed homework, quiz, or test deadlines due to failure to purchase access to your online materials.**

If you have any questions regarding your MyMathLab Plus account, email the course instructor. Please note that there will be **NO EXTENSIONS for missed homework, quiz, or test deadlines due to failure to purchase access to your online materials.**

STUDENT EXPECTATIONS STATEMENT:

The Course Syllabus and Schedule serve as a Contract by which the student must comply. An excuse of "not knowing" information covered in these documents is not an acceptable excuse for making mistakes in this class.

- Students are required to complete weekly assignments and learning activities by the deadline. All deadlines are based on CENTRAL TIME. **There are NO EXTENSIONS of DEADLINES**, however you can complete homework and quiz assignments late for up to half credit.
- Students are expected to maintain an active BlazerNet account.
- Students are expected to read the Schedule and Syllabus for this class in Canvas.
- Students are expected to check their UAB email daily and respond within 48 hours to instructor emails.
- All students are required to obtain and use the UAB email address that is automatically assigned to them as UAB students. All official correspondence will be sent ONLY to the @UAB.edu email address.
- All students are responsible for ensuring that the correct UAB email address is listed in Canvas by the end of Week 1, and that their UAB email account is in proper working order during the entire time they are enrolled at UAB. Email is the only way the Course Instructor can, at least initially, communicate with students. It is the student's responsibility to make sure a valid email address is provided. Failure on the student's part to do so can result in the student missing important information that could affect his grade. **Students are responsible for the information that is sent to their UAB email account.** The Course Instructor will not accept emails sent from other accounts.
- **Students are expected to devote an average of 8 to 12 hours per week to this class.**
- **Students are expected to have a back-up plan** in the event their computer has operational problems, there is loss of electricity, or there is loss of Internet access. These are not an excuse for late or incomplete submission of assignments, nor are they acceptable reasons for an assignment deadline extension. UAB's MLL, most public libraries, school libraries, university libraries, etc. have computers with Internet access and are available for use by the public.
- The **Math Learning Lab (MLL)** in 202 Heritage Hall is available for student use Monday through Friday. Students in this course may use the computers to complete assignments, and they may get assistance from math tutors. Tutors will not solve all of your problems or sit with you for extended periods of time, but they will help guide you so that you can complete your work independently. No appointment is necessary. The hours of operation are usually Monday through Thursday 9:00am to 7:00pm, and Fridays 9:00am to 2:00pm. Limited hours are available during final exams. The MLL is closed during all holidays and breaks. Go to the math department website and click on Student Resources tab for details (<http://www.uab.edu/mathematics>). Note that all computer use in the MLL is monitored.
- Students are expected to participate in this course by following the Course Syllabus, Class Schedule, and any additional information provided by the Course Instructor.
- Students are expected to remain in regular contact with the Course Instructor via UAB email.
- **Students are expected to use their UAB email** for one-on-one instructor/student conferencing or to schedule an individual meeting. If a student has a question about the material, then he should ask for help during the Lab meeting or use the Ask My Instructor link in MyMathLab Plus at other times to email the instructor.
- **Students are expected to review their grades and participation** by clicking on UAB Grade for MA 102-QL in MyMathLab Plus (<https://secure.cas.uab.edu/mlldb>) **on a regular basis**. The Course Instructor does not use email to communicate grades or comments about graded assignments.
- Students in this class will be expected to:
 - Speak and write Standard English.
 - Work cooperatively with others.

- Possess independent reading and study skills at the university level.
- Possess basic computer skills.
- Possess the appropriate computer software and hardware necessary for successful participation in the class if they choose to work outside the MLL.

TECHNOLOGY REQUIREMENTS - Students must have:

- Access to BlazerNet. Students will link to Canvas and MyMathLab Plus here.
- A UAB email account that can be accessed on a daily basis.
- Email software capable of sending and receiving attached files.
- Students who work outside of the MLL must have:
 - Reliable access to the Internet with a 56k modem or better.
 - 1 GB RAM or better.
 - 2GHz processor or better.
 - A personal computer capable of running MyMathLab Plus. Students who use older or beta browser versions will have compatibility problems with MyMathLab Plus.
 - Virus protection software, installed and active, to prevent the spread of viruses via the Internet and email. It should be continually updated!
 - Not having a computer, computer problems, computer crashes, loss of Internet, and/or loss of electricity are NOT acceptable excuses for late work, incomplete work, or a request for an assignment deadline extension. **Students are expected to have a back-up plan** in case any of these occur.

CLASS SCHEDULE - A copy of the class schedule is posted in Canvas. The class schedule identifies the specific dates and times of all assignments and deadlines. It also identifies the chapters and sections of the text that correspond to the homework, quizzes, and tests.

COURSE STRUCTURE - This course is primarily computer-based. Students must have reliable access to **BlazerNet** so they can work on their assignments in MyMathLab Plus and Canvas. Students who work on the assignments outside of the MLL must ensure that they meet the system requirements.

Before beginning your first assignments in MyMathLabPlus, there is a required Syllabus Quiz.

Students are required to earn 100% on this quiz to gain access to the homework and quiz sets.

- **HOMEWORK** - There are 13 homework assignments that are required, and each is worth 6 points. Homework is completed and submitted in MyMathLab Plus (access code required). Students access MyMathLab Plus through BlazerNet. When the homework is submitted or closed in MyMathLab Plus, a score and percentage are given.

An unlimited number of attempts can be made on each homework problem before the deadline, so students should be able to earn 100% on ALL HOMEWORK. If a problem is marked with a red (X) as incorrect, then the student can click on *Similar Exercise* at the bottom of the page and work another problem correctly for full credit (before the deadline). Students can go in and out of the homework as many times as they like before the deadline (all of the work is automatically saved). Students earn points for homework completed on or before the due date. After the due date, students can review homework assignments and work similar exercises, but they cannot change their score.

All homework is available at the beginning of the term, so students may work ahead as much as they like. **There are NO EXTENSIONS or make ups for missed homework, but work can be completed after the deadline for up to half credit.**

- **QUIZZES** - There are 13 Quizzes that are required, and each is worth 6 points. Quizzes are completed and submitted in MyMathLab Plus. Students access MyMathLab Plus through BlazerNet. Once a Quiz is submitted in MyMathLab Plus, it is scored and a percentage is given. Students take the Quizzes on their own schedule, but they can only earn the Quiz points if the Quiz is taken on or before the due date. **Students must complete the Quizzes BY THEMSELVES without any assistance from another person.** The Quizzes are timed, and they **must be taken in one sitting within 30 minutes.** Students cannot exit the Quiz or that will count as one of their attempts. Each quiz can be taken twice, and the highest score attained will count.

All Quizzes are available at the beginning of the term, so students may work ahead as much as they like. **There are NO EXTENSIONS or make ups for missed Quizzes, but work can be completed after the deadline for up to half credit.**

- **TESTS** - There are four Exams and a Final Exam. Tests are completed and submitted in MyMathLabPlus. ProctorU will be used to monitor the testing session. Each Exam is worth 100 points and the Final Exam is worth 250 points. Once a test is submitted in MyMathLabPlus, it is scored and a percentage is given. The UAB score for the test can be found online at <https://secure.cas.uab.edu/ml/db/> or by clicking on "Check Your Grade" in MyMathLabPlus or Canvas. Students must take the tests during the scheduled dates and times under supervised remote proctoring as described in this syllabus. **Students must use their computer (Windows/Safari) scientific calculator during testing.** NO personal calculators are allowed. Students may use a paper sized whiteboard during testing, no paper is allowed. **Students are required to have a government issued photo ID during testing (UAB student ID, driver's license, etc).**
- **Practice Tests** are available in MyMathLabPlus. The Practice Tests do not count against a student's grade (up to 4 bonus points for each practice exam and up to 4 bonus points for the final exam may be earned), but they are recommended as a way to help them prepare for their tests. **The practice tests are NOT timed, and students may go in and out of them until they are ready to submit.** Each practice test may be taken an unlimited amount of times.
- **PROBLEMS/Group Discussions (found in the current Module in Canvas)** – There are 13 weekly problems. Each week students are required to participate in a Group Discussion (according to the Group Discussion Rules posted on Canvas) to solve a problem. Then they must submit their solutions as individual papers in Canvas by the deadline (see Course Schedule). Students can earn up to 8 points on each individually submitted Problem and up to 7 participation points on each Group Discussion for a total of 15 points.

REQUIREMENT for Taking Tests:

Students will take the course tests using remote proctoring services through ProctorU. You will find the information regarding ProctorU on Canvas. Please read the ProctorU handout information carefully before testing.

Students are responsible for the technical requirements needed. The deadline for each test is posted on your course schedule.

Do not wait until the test due date to take and/or schedule your test. If you choose to wait until the due date to take your test, you are assuming the risk that some situation may prevent you from taking your test. Power outages, technical issues, and student personal problems are not acceptable reasons for missing a test deadline.

- **NOTE THAT STUDENTS ARE RESPONSIBLE FOR PROCTORU TESTING FEES THAT ARE NOT COVERED BY UAB eLearning. UAB eLearning will NOT cover late fees or convenience testing fees but may cover regular test fees. Please see the ProctorU Student Information document posted in Canvas under the ProctorU Module.**

We reserve the right to require a student to re-take a test with ProctorU if any testing inconsistencies or questions of academic integrity arise during the testing session or after the review of the recording by the instructor. Students will be responsible for payment of any fees to retake a Test.

Academic misconduct undermines the purpose of education and can generally be defined as all acts of dishonesty in an academic or related matter and will not be tolerated.

Completing HW, Quizzes, and Tests in MyMathLab Plus -All HW, Quizzes, and Tests may only be accessed through **BlazerNet**. Before students begin working at home, they must run the **browser check** and make sure they meet the **system requirements**. Please note that no make ups or extension of deadlines are given for technical problems.

Some troubleshooting tips for problems with MyMathLab Plus:

- **Close the browser** and start again by logging into BlazerNet.
- **Try another browser** if yours doesn't work. Install and use only supported browsers.
- You can only ACCESS YOUR COURSE through BlazerNet. **No other login pages will work.**
- If nothing works, contact Pearson's technical support via CHAT.
- Have a back-up plan. Make arrangements to work in the MLL or elsewhere in advance.
- **Email the instructor** if you have problems. He/she might be able to help.

Canvas SITE MAP FOR MA 102

- **HOME**- This is the entry point for your Canvas course. You will be able to see links to all modules here.
- **SYLLABUS, SCHEDULE, & COURSE MATERIALS** - The following information can be found here: Instructor information, Syllabus, Schedule and Additional Assignment Information, Rubric for MA 102 Group Problems, Groups Rules, and ProctorU testing information.
- **MODULES** – Your course will be divided into weekly modules. You will be able to access the current week's assignments by clicking on the current week in Canvas. In each module will be a series of assignments to complete along with the weekly goals.
- **GRADES** – You will be able to view grades for your weekly discussion and problem here. NOTE: Grades for homework, quizzes, and tests, as well as your overall grade, must be viewed in the UAB grade database (log in to MyMathLabPlus and click on the UAB Grade for MA 102-QL link to view all grades).

COURSE GRADES - Students earn their grade in the course by accumulating points. There is a maximum of 1000 points available. No points are available after the Final Exam is taken, so students should earn as many points as possible throughout the semester by completing all assignments by the deadline. NO late assignments are accepted or allowed, and no adjustments will be made.

All assignment grades will be posted and maintained in the math department database, which can be accessed in by going to <https://secure.cas.uab.edu/mlldb/>.

Note that **FINAL GRADES are awarded by TOTAL POINTS EARNED**, NOT by percentages. Percentages give students an idea of how they are doing in the class on a day-to-day basis, but they are constantly changing since they are based on the deadlines as of the current date. Percentages are not rounded. Total points and percentages won't usually match until the end of the semester (after all deadlines have passed).

Homework, Quiz, and Test grades are automatically updated and loaded into the database on a daily basis. All other grades will be manually entered by the instructor as soon as possible after grading (usually within one week).

See the following tables for point and grade distribution:

Number of Points	Letter Grade
880 to 1000	A
750 to 879	B
620 to 749	C
500 to 619	D
Below 500	F

Grade Element	Max Points per assignment	Number of Assignments	Total Points
Homework (MyMathLabPlus)	7	13	91
Quizzes (MyMathLabPlus)	8	13	104
Problems (Canvas)	8	10	80
Group Discussions (Canvas)	7	10	70
Intro Discussion (Canvas)	3	1	3
Honor Code (Canvas)	2	1	2
Tests (MyMathLabPlus)	100	4	400
Final Exam (MyMathLabPlus)	250	1	250
Total Points			1000
Practice Tests (Bonus)	4	5	20

MAKE-UP WORK POLICY – In general, NO MAKE-UPS are allowed.

There is no appeal for missed discussions, group problems, or deadlines for Homework and Quizzes.

- **If a student misses 1 test** (not including the Final Exam), the Final Exam grade will be used to replace the missed test grade if the student formally makes a request to do so. The student must complete a **Replacement Test Grade** form in the math department office (UH 4005) no later than 12:00pm on the last day of classes. **Note that only one missed test grade may be replaced with the Final Exam grade. All students are expected to attend the Final Exam session.**
- *A student missing a test due to university related business or government mandated activities is required to notify the instructor **no later than one week prior to the missed test date in order to be able to take the test prior to scheduled test date.** If a student does not communicate with the instructor one week prior to the missed test date, the student will be required to use the Final Exam grade to replace the missed test grade.*

USEFUL WEBSITES FOR THIS COURSE

BlazerNet (access to Canvas and MyMathLab Plus): <http://www.uab.edu/blazernet>

UAB MA 102 grade: <https://secure.cas.uab.edu/ml/db/>

UAB Department of Mathematics (see Student Resources): <http://www.uab.edu/mathematics>

Extended Absences: Attendance is fundamental to course objectives and to the integrity of this course. Courses in the Mathematics Department require a variety of activities that involve interaction with the instructor and/or interaction with other students. Excessive absences and missed assignments seriously jeopardize a student's ability to successfully complete the course. In the event of excessive absences, students should be prepared to officially withdraw from the course through the Registrar's Office. In cases involving medical hardships, military duty, or other serious personal situations after the withdrawal date for a course, the student may participate in the Academic Policy Appeal (accessed and submitted through Blazernet Links/Forms).

STUDENT/FACULTY INTERACTION

Interaction will take place via appointments, email, by telephone (only in case of emergency), and through Announcements.

The student will participate in this course by following the guidelines set forth in this Syllabus and the class Schedule, and any additional information provided by the Course Instructor.

Students are expected to attend all Class and Lab meetings, and to remain in regular contact with the Course Instructor.

Personal communication with the instructor should be done during the Lab meeting or a request for a private meeting should be sent through email.

The Course Instructor will check emails daily and will respond to emails containing questions, comments, and concerns within 24 to 48 hours on weekdays and 48 hours on weekends.

Comments and scores on graded group problems are included in the returned papers. Scores can also be seen on the UAB grade database (<http://www.uab.edu/mathematics>). Students are expected to review their grades to make sure they are recorded properly.

TECHNICAL SUPPORT INFORMATION

If technical problems are experienced with **BlazerNet**, students should contact UAB AskIT at <http://uab.edu/it/home/askit> and also inform the instructor.

For help within **Canvas**, students should use the HELP tab at the top right.

If technical problems are experienced with **MyMathLab Plus**, students should log in and click on Help & Support at the top right or go to <http://247pearsoned.custhelp.com/app>. The quickest way to get support is to use the CHAT contact method. Students should also inform the instructor.

Some troubleshooting tips for problems with MyMathLab Plus:

- **Close the browser** and start again by logging into BlazerNet.
- **Try another browser** if yours doesn't work. Install and use only supported browsers.
- You can only ACCESS YOUR COURSE through BlazerNet. **No other login pages will work.**
- If nothing works, contact Pearson's technical support via CHAT.
- Have a back-up plan. Make arrangements to work in the MLL or elsewhere in advance.
- **Email the instructor** if you have problems. He/she might be able to help.

NON-HARASSMENT, HOSTILE WORK/CLASS ENVIRONMENT – The UAB College of Arts and Sciences expects students to treat fellow students, their Course Instructors, other UAB faculty, and staff as adults and with respect. No form of hostile environment or harassment will be tolerated by any student or employee. In this class we will only use constructive criticism and will work to build a community of lifelong learners.

ADAPTIVE NEEDS (ADA) – ADA CONSIDERATIONS

The UAB office of Disability Support Services approves special accommodations to students who qualify. The UAB DSS office can be contacted by telephone: 934-4205 or by email: dss@uab.edu. Students who have DSS-approved accommodations must notify the instructor as soon as possible and make arrangements to meet to discuss the accommodations. No accommodations will be granted until DSS documentation is provided and the student has discussed the accommodations with the instructor. Every reasonable request for accommodation will be met where possible. If a student feels he needs additional consideration, he should contact UAB Disability Support Services at 934-4025 and notify the instructor about the request.

HONESTY AND PLAGIARISM - The awarding of a university degree attests that an individual has demonstrated mastery of a significant body of knowledge and skills of substantive value to society. To ensure this, **UAB expects all students to abide by the UAB Academic Honor Code:**

The UAB Academic Honor Code

UAB expects all members of its academic community to function according to the highest ethical and professional standards. Students, faculty, and the administration of the institution must be involved to ensure this quality of academic conduct. Academic misconduct undermines the purpose of education. Such behavior is a serious violation of the trust that must exist among faculty and students for a university to nurture intellectual growth and development. Academic misconduct can generally be defined as all acts of dishonesty in an academic or related matter.

Academic dishonesty includes, but is not limited to, the following categories of behavior:

ABETTING is helping another student commit an act of academic dishonesty. *Allowing someone to copy your quiz answers or use your work as their own are examples of abetting.*

CHEATING is the unauthorized use or attempted use of unauthorized materials, information, study aids, the work of others, or computer-related information. *Getting someone to do your HW or to take your quizzes are examples of cheating.*

PLAGIARISM means claiming as your own the ideas, words, data, computer programs, creative compositions, artwork, etc., done by someone else. Examples include improper citation of referenced works, the use of commercially available scholarly papers, failure to cite sources, or *copying another person's ideas.*

FABRICATION means presenting falsified data, citations, or quotations as genuine.

MISREPRESENTATION is falsification, alteration, or the misstatement of the contents of documents, academic work, or other materials related to academic matters, including work substantially done for one class as work done for another without receiving prior approval from the instructor.

Violations of the UAB Academic Honor Code are punishable by a range of penalties, from receiving a failing grade on an assignment to an F in the course to dismissal. Any course grade of F for academic misconduct supersedes any other grade or notation for that class. Withdrawal from a course while a possible violation of the Academic Honor Code is under review will not preclude the assignment of a course grade that appropriately reflects the student's performance prior to withdrawal if the violation is substantiated.

TURNITIN - UAB reserves the right to use electronic means to detect and help prevent plagiarism. By enrolling at UAB, students agree to have course documents submitted to [www.Turnitin.com](http://www.turnitin.com) or other means of electronic verification. All materials submitted to Turnitin.com will become source documents in Turnitin.com's restricted access database, solely for the purpose of detecting plagiarism in such documents. Students may be required by instructors to individually submit course documents electronically to Turnitin.com.

LIBRARY SUPPORT - The Libraries at UAB provide access to materials and services that support the academic programs. The following is a link to the main library (Mervyn Sterne Library)
<http://www.mhsl.uab.edu/>.

FACULTY EVALUATION – At the end of each term, students will be notified to fill out a Course Evaluation Form (IDEA Survey). These evaluations are completely anonymous and are online for all students.

IRB/RESEARCH STATEMENT:

Federal regulations and university policies require Institutional Review Board (IRB) approval for research with human subjects. This applies whether the research is conducted by faculty or students. At the same time, many class projects are conducted for educational purposes and not as research, and will not require IRB approval. In this course, students work on group problems and may have to ask others for information to be used as data, but this will be done anonymously as part of an educational exercise; therefore, no IRB approval is needed. For more information about UAB OIRB, go to irb@uab.edu.

DSS Accessibility Statement: UAB is committed to providing an accessible learning experience for all students. If you are a student with a disability that qualifies under Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act, and you require accommodations, please contact Disability Support Services for information on accommodations, registration and procedures. Requests for reasonable accommodations involve an interactive process and consist of a collaborative effort among the student, DSS, faculty and staff. If you are registered with Disability Support Services, please contact DSS to discuss accommodations that may be necessary in this course. If you have a disability but have not contacted Disability Support Services, please call 934-4205 or visit <http://www.uab.edu/dss> or Hill Student Center Suite 409.

Title IX Statement: The University of Alabama at Birmingham is committed to providing an environment that is free from sexual misconduct, which includes gender-based assault, harassment, exploitation, dating and domestic violence, stalking, as well as discrimination based on sex, sexual orientation, gender identity, and gender expression. If you have experienced any of the aforementioned conduct we encourage you to report the incident. UAB provides several avenues for reporting. For more information about Title IX, policy, reporting, protections, resources and supports, please visit <http://www.uab.edu/titleix> for UAB's Title IX Policy, UAB's Equal Opportunity, AntiHarassment Policy and Duty to Report and Non-Retaliation Policy.
