COURSE DESCRIPTION
CALCULUS II REMOTE
MA 126–OD, SUMMER 2020

DEPARTMENT OF MATHEMATICS
UNIVERSITY OF ALABAMA AT BIRMINGHAM

Course Instructor: Professor Alexander Blokh
Office: University Hall, Room 4018
Phone#: (205) 934-2154
E-mail: ablokh@uab.edu
Zoom Meetings: Please use Canvas to connect to class meetings.
Office Hours: MW before class; you can also email for a private Zoom appointment.

Homework and Test Files: For each homework assignment and test (including the final) you are required to submit a single pdf file on or before the due time to my email address above. Homework and test booklets can be scanned using a mobile scanning app such as Adobe Scan, for example.

Meeting times: MTuWTh 11:30-13:00
Meeting location: Online via Zoom.
Prerequisite: Grade of C or better in MA 125 or equivalent.
Credits: 4 semester hours.
Reference Textbook: Essential Calculus, Second Edition by James Stewart, Thomson-Brooks/Cole, 2013, Chapters 5–8, 10 (see below for more detail)

Important dates:
First day of classes: Monday June 08, 2020.
Last day to drop/add classes: Monday June 15, 2019.
Last day to withdraw with a “W”: Friday July 10, 2020.
Last day of classes: Friday August 07, 2020.

Major tests:
Test I: near Thursday, June 25;
Sections: 5.6, 5.8, 6.1–6.3, 6.6, 7.1-7.3, 7.6
Test II: near Tuesday, July 14;
Sections: 8.1 – 8.7;
Test III: near Thursday, July 30;
Sections: 10.1 – 10.5, 10.7, 10.8.

The above dates and sections are tentative; precise dates and test section numbers will be announced in class a week or so before a test.

Date: June 8, 2020.
Exam Week: August 08 – August 14, 2020.
Final exam: 4:15-6:45pm Wednesday August 12, 2020; Zoom.

Course policies.
• Please make sure that you are able to receive e-mail through your Blazer-ID account. Official course announcements may be sent to that address.
• If you are contacted by the Early Alert Program, consider taking advantage of their services; see Student Resources on the Blazernet website.
• For disability accommodations contact DSS at 934-4205 or at dss@uab.edu.
• The lowest weekly homework grade will be dropped to account for any missed assignments due to illness or any other circumstance.
• If a test is missed due to a serious verifiable circumstance or official university business, the test grade will be replaced with the properly rescaled final exam score. You must advise the instructor of such circumstances at the earliest possibility before the exam takes place.
• While calculators that do not have access to the internet are permitted, no books or notes will be allowed during any of the tests, with the exception that you are allowed to bring in one 8.5” × 11” sheet of your own construction to each test/final.

Methods of teaching and learning.
• 35 90-minute class meetings consisting of lectures and discussions of examples and homework problems. Time for three in-class tests is included.
• In the majority of cases you will have to work with Khan Academy lectures available online; these lectures and the textbook are the main source of theoretical material for you. The actual video lectures can be found in the course of Calculus BC on their website at https://www.khanacademy.org/math/ap-calculus-bc
• Your online lectures will be devoted to a brief overview of the theoretical material and then to solving related problems. Consider these as your daily in-class tutorials. I or my assistant will solve problems, and you will have a chance to ask questions in the process to make sure that your understanding is correct.
• Students are expected to undertake at least 15 hours of private study and homework per week during the term.
• Each week you will be assigned the homework assignment for the week. The assignments are always due on that Sunday. E.g., if your homework is assigned on Tuesday June 23, then it is due on Sunday, June 28. Late submissions will be graded for correctness, but will not count toward the course score.
• At least one class before any midterm test will be used in similar fashion as a tutorial for your test review problems, which I will distribute at least a week before each test.

Aims of the course.
Upon successful completion of the course a student
• understands the concept of definite integral;
• is able to apply the definite integral to find volumes, work, and arc length;
• knows the basic techniques of integration;
• is able to apply Calculus concepts to problems in Physics and Engineering;
• understands the concept of a vector, can perform basic vector calculations, and is able to use vectors to describe lines and planes in space;
• understands the concept of vector-valued functions, and is able to use vector functions to describe parametric curves, tangent vectors and velocity;
• is able to determine the convergence/divergence of improper integrals, sequences, and infinite series; and
• can find power series representations of functions and use them for approximation, evaluation of integrals, and limits.

The understanding of a concept is demonstrated by an ability to solve pertinent problems related to that concept.

Course content.
• Basic techniques of integration including substitution, integration by parts, partial fractions and the use of tables.
• Applications of integration (area, volume, work).
• Sequences and series, power series.
• Vectors in three dimensions, their geometric and algebraic representation, dot product and cross product.
• Equations of lines and planes.
• Vector functions and parametric curves, tangent vectors, arc length, velocity and speed.

Assessment procedures.
• Student achievement will be assessed by the following measures:
  – **Webassign.** Your online homework contributes 20% to the course average.
  – **Regular graded homework.** Written homework will be assigned each week and will be due on Friday of the same week. It contributes 20% to the course average. Problems on tests are modeled after homework problems and webassign problems.
  – **Three 90-minute in-class tests.** Each test contributes 12% to the course average and typically includes a mixture of shorter questions (or parts of questions) designed to test insight and manipulative skills, together with longer problems requiring in-depth understanding, including “word” problems.
  – **150-minute comprehensive final examination.** The final is comprehensive and contributes 24% to the course average.
• Your course performance is your course average, which is a number between 0 and 100 obtained by adding the weighted scores from the homework, tests, and final.
• Your final grade is determined according to the following table:
  
<table>
<thead>
<tr>
<th>Course performance</th>
<th>Final Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>88-100</td>
<td>A</td>
</tr>
<tr>
<td>75-87</td>
<td>B</td>
</tr>
<tr>
<td>62-74</td>
<td>C</td>
</tr>
<tr>
<td>50-61</td>
<td>D</td>
</tr>
<tr>
<td>below 50</td>
<td>F</td>
</tr>
</tbody>
</table>

• After the final exam score and grades have been entered, grades may be checked via [https://www.uab.edu/cas/mathematics/resources](https://www.uab.edu/cas/mathematics/resources) under the heading **Check Grades.**
Tips.

- Past tests are available at http://www.uab.edu/cas/mathematics/calculus-testbank.
- Help is available in the Math Learning Lab, if you can’t find me.
- Working steadily, regularly attending class, and asking lots of questions when you are stuck (a practice I strongly encourage!), all increase your chances of success.
- Ultimately, you are in charge of your mathematics education, but my assistant and I are more than willing to help you chart an effective path through the Calculus wilderness.
- Remember, being a full-time student is a full-time job.

How to get started on Enhanced WebAssign:

1. Go to www.webassign.net and click on I HAVE A CLASS KEY in the signing link.
2. Enter the following course key: **uab 8855 0425**
   and proceed. (If prompted for your institution, enter uab)
3. When prompted to purchase an access code, select “...trial period” (Do not purchase an access code at this time. However, you must purchase an access code within two weeks for you to continue using the system beyond the two-week trial period. The system will prompt you to enter your access code when the deadline approaches. Your book may have an access code bundled with it. You must use it. Considering buying options, you may also want to look at https://www.cengage.com/unlimited/)
4. After your first registration, you can sign in as returning user.
5. Should you run into technical problems Enhanced WebAssign provides technical support online and/or by phone.
