MA 418-QL Intro to Statistics

Syllabus

COURSE INFO

Instructor: Junfang Li
Email: jfli@uab.edu
Office Hours: tba

First day of class: Monday June 3rd, 2024
Final Exam: Tuesday August 6th, 2024, by 8pm

COURSE DESCRIPTION

This course supports the development of quantitative literacy. As such, the course is about learning the concepts and principles of statistics and then being able to choose among various statistical methods when presented with a brand-new problem. The actual calculations required in applying statistical methods is done using a calculator or computer program.

COURSE MATERIALS

Access Code
The MyMathLab access code for the course is required and is available through Canvas with the First Day access unless you opt out. Access is also available for purchase at the bookstore, but more expensive. There is no textbook for the course, eText is included with the Access Code.

Formula Sheet
The formula sheet is allowed to be used during testing and is in the Course Resources on Canvas. It is recommended to use the formula sheet during the completion of your assignments.

Calculator
Only the Desmos Scientific calculator (https://www.desmos.com/scientific) will be allowed during tests, no personal calculators. A link is provided in the Course Links Module. Students can use StatCrunch, which is included with MyMathLab for computations as well. Tutorials are provided on Canvas.

COURSE CONTENT

- Handle data sets, construct and interpret tables, graphs, and schematic representations of mathematical relations
- Translate verbal descriptions into mathematical form
- Compute statistics and evaluate the significance of observations
- Probability laws and empirical data
• Measures of center and variability
• Normal distributions
• Sampling distributions
• Hypothesis testing and confidence intervals
• Linear regression analysis
• Analysis of categorical data
• One-way analysis of variance

COURSE OBJECTIVES

1. Recognize and analyze sampling methods and the importance of collecting data.
2. Develop the ability to organize, summarize, and represent data in ways that enable us to see important characteristics.
3. Apply methods of descriptive statistics to summarize or describe relevant characteristics of data.
4. Collect sample data gathered in the community and analyze it using summary statistics.
5. Identify, interpret, and calculate probability values.
6. Select and use discrete or continuous probability distributions.
7. Apply basic methods for hypothesis testing to a collected data set and interpret the results to create possible further actions.
8. Use basic methods of testing claims about population parameters by selecting sample data to estimate values of population parameters as well as conducting tests about population parameters.
9. Analyze paired data to determine correlation and identify a linear regression equation to predict values.
10. Use statistical methods for analyzing categorical data that are separable into different cells.
11. Identify and apply methods of one-way analysis of variance to conduct hypothesis tests.

COURSE ACCESS

Canvas

All additional course materials as well as deadlines will be on Canvas. Official communication will be done through Canvas announcements or in person. Canvas will be used to access online assignments in MyMathLab, as well as the lecture notes used during class meetings.

MyMathLab

All previews, homeworks, quizzes, and tests for this course are available in MyMathLab only. A user account is required for every student and needs to be activated through Canvas. You won’t need an access code unless you opt out of the First Day access provided at a reduced cost. Instructions can be found under Course Information.

NO EXTENSIONS for missed assignments due to failure to activate your account or opt out of First Day access.

Browser

It is recommended to use Mozilla Firefox or Google Chrome to avoid any browser issues with Canvas or MyMathLab.

ProctorU

All students are REQUIRED to take their tests with ProctorU, and they are responsible for ensuring they have the proper equipment to test with ProctorU. You can check your device from your ProctorU account after downloading
the Guardian Browser and clicking on “Test Your Equipment”. Note that students may NOT use Chromebooks. High speed, reliable internet service is REQUIRED. More Information can be found in the Course Information Module.

Students are responsible for fees that are not covered by UAB eLearning due to failure to sign up at least 72 hours in advance.

We reserve the right to require a student to re-take a test with ProctorU if any testing inconsistencies or questions of academic integrity arise during the testing session or after the review of the recording by the instructor. Students will be responsible for payment of any fees to retake a Test.

Academic misconduct undermines the purpose of education and can generally be defined as all acts of dishonesty in an academic or related matter and will not be tolerated.

**COURSE GRADE**

Your grade in the course is determined by the points earned throughout the semester and a Pass/Fail project.

<table>
<thead>
<tr>
<th>Assignments</th>

**Preview**

There is a Preview Assignments that is required before you can attempt the weekly Homework Assignments. It is important to work through them to gain the basic understanding needed for the remaining assignments that they go with. It serves as an introduction for new concepts and is completed in MyMathLab. No credit will be given for late completions.

**Homework**

The homework exercises are done using a computer program named MyMathLab. Homework assignments must be completed no later than 11:59 PM on the day specified in your course schedule to receive full credit. Any work submitted after the deadline will receive half-credit automatically. To work on exercises again after the deadline, you need to go to Review your Work in MyMathLab or it will reduce your score for late work.
Quizzes
Like the homework, quizzes are taken on-line. Each quiz can be taken two times (the highest grade will count). Do not hit the BACK button on your browser when taking a quiz. This will end your quiz and you will not be able to get back into it. If you think your computer or network connection is not reliable, you should take your quizzes in the UAB Math Learning Lab (if available). Quizzes have a 30-minute time limit. Students are strongly advised not to wait until the last minute to complete homework and quizzes. Problems occurring at the last minute are the responsibility of the student. Quizzes must be completed no later than 11:59 PM on the day specified in your course schedule to receive full credit. Any work submitted after the deadline will receive half-credit automatically.

Tests/ Final Exam
There will be four 50-minute tests and a 120-minute final exam. The final exam will be comprehensive. The tests and final exam must be completed with the Desmos Scientific calculator, formula sheet, and two blank pieces of paper through ProctorU. You will have a three-day window to take your test. The textbook itself cannot be used. You can use StatCrunch during testing, but no other resources. Students found using anything besides the permitted items during testing will receive a zero on the test and will be reported to the University Academic Integrity Office. All testing must be completed by the deadline day at 8PM with ProctorU.

Practice Tests
The way you prepare for the tests is by completing the homework and quiz assignments for understanding. Also, you will have a practice test available for each test and the Final Exam in the course. There is no make up for missed practice tests.

Discussion
Weekly discussion participation is required for the course. They will be available over multiple days and students are expected to make a post and leave two comments on the post of other students. However, more posts are encouraged and will be needed for good group interaction to solve the problems assigned for the discussion. Posting solutions to problems in the discussion is forbidden and will be penalized with no credit. Participation is important for learning and improving communication skills. Therefore, there is no makeup for missed discussions.

Problem
Weekly group problems will be solved during the assigned lab days in HHB 202. Each student is accountable for their individual submission and answers should not be copied from members of the group. Once you have completed your problem, you can use the remainder of the lab time to work on your homework and ask questions. No makeup is offered for missed meetings.

Honor Code and Syllabus Quiz
Both assignments should be completed before any other assignments in Canvas. The Syllabus Quiz will be completed to ensure that you have read and understand the contents of this document. It will contain important aspects of the course and its structure. By completing it, you certify that you have read and understand the syllabus. The Honor Code will be used for you to certify that you will abide by the UAB Honor Code and that failure to do so can result in severe penalties.
Knowledge Quiz & Mastery

At the beginning of the semester, you will take a Knowledge Quiz containing questions about Math skills needed for this course that you should have to be successful. The quiz will determine how many questions of the mastery that you will need to complete. The quiz should be taken without any resources to show you which topics you need a little bit more practice with and which you will receive automatic credit for.

Bonus Points

You will have the opportunity throughout the semester to earn Bonus points in the course. These will include the syllabus quiz, honor code, practice tests, and the knowledge mastery for a total of 25 points.

Project

As a 418 student, you will have an additional project to complete. It will be graded out of 100 points. If you receive less than 70 points on both portions together, your course grade will automatically be lowered by a whole letter grade. The work for the project will be submitted on Canvas through two separate assignments, Collect Data and Inference. See Canvas for deadlines.

Make-ups

There is no make-up for any assignments. This is because they can and should be completed ahead of time or participation is important. However, you can complete the homework and quiz assignments late for half credit. Otherwise, you can use the bonus points to replace missed points.

- If a student misses 1 test (not including the Final Exam), the Final Exam grade will be used to replace the missed test grade if the student formally makes a request to do so. The student must complete a Test Replacement Form under the Course Resources on Canvas no later than 5:00pm on the last day of classes. Note that only one missed test grade may be replaced with the Final Exam grade. All students are expected to complete the Final Exam.

- A student missing a test due to university related business or government mandated activities is required to notify the instructor no later than one week prior to the missed test date in order to be able to take the test prior to the scheduled test date. If a student does not communicate with the instructor one week prior to the missed test date, the student will be required to use the Final Exam grade to replace the missed test grade.

COURSE POLICIES

Cell phones and other electronics

All cell phones, tablets, and other electronic devices must be turned off and put away during testing. Violations will result in penalties determined by the director of Pre-Calculus Curriculum and can result in a grade of F in the course.

Grade Review

Official student grades are maintained in the Math Department grade database (a.k.a. MADDIE). To access your grade record, go to www.uab.edu/mathematics and click on Student Resources then Check grades. You will need to enter your BlazerID and password. You can also access it through Canvas under UAB Grade for MA 180/418.
Students are asked to review all grades for accuracy immediately after they are posted. **All questions involving homework grades, quiz grades, test grades and participation points must be resolved before the final exam.** Once the final exam is taken the course is complete, and no further review of in-term grades is permitted.

**Generative AI Use is Prohibited**

The use of generative AI is strictly prohibited in this course. Academic misconduct is present in academic work wherever AI assistance has been used when unauthorized. Such behavior is considered deceitful and a violation of UAB’s shared commitment to truth and academic integrity. Deceit constitutes academic misconduct and is subject to review according to UAB’s Academic Integrity Code.

**Tutoring**

Please visit Resources on the Math Department website and see the times for MA 180 at [https://www.uab.edu/cas/mathematics/resources](https://www.uab.edu/cas/mathematics/resources). Tutoring will be available except for holidays and Final Exam week.

**Email**

Information about the course (changes to assignments, reminders, schedules, etc.) will be distributed to students using their BlazerID email address or Canvas. Each student is required to access their UAB email account daily, as these communications represent official university business. This is a requirement for all UAB students. For UAB email account assistance, send an email to userservices@uab.edu, or call 934-3540.

**Extended Absences**

Attendance is fundamental to course objectives and to the integrity of this course. Courses in the Mathematics Department require a variety of activities that involve interaction with the instructor and/or interaction with other students. Excessive absences and missed assignments (more than 2 weeks) seriously jeopardize a student’s ability to successfully complete the course. In the event of excessive absences, students should be prepared to officially withdraw from the course through the Registrar’s Office. In cases involving medical hardships, military duty, or other serious personal situations after the withdrawal date for a course, the student may participate in the Academic Policy Appeal (accessed and submitted through Blazernet Links/Forms).

**Disability support Services (DSS)**

UAB is committed to providing an accessible learning experience for all students. If you are a student with a disability that qualifies under Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act, and you require accommodations, please contact Disability Support Services for information on accommodations, registration and procedures. If you are registered with Disability Support Services, please contact DSS to discuss accommodations that may be necessary in this course. Disability Support Services can be reached at 934-4205 or www.uab.edu/dss or in the Hill Center Suite 409.

**Title IX Statement**

UAB is committed to providing an environment that is free from sexual misconduct, which includes gender-based assault, harassment, exploitation, dating and domestic violence, stalking, as well as discrimination based on sex, sexual orientation, gender identity, and gender expression. If you have experienced any of the aforementioned conduct we encourage you to report the incident. For more information about Title IX, policy, reporting,
protections, resources and supports, please visit http://www.uab.edu/titleix for UAB’s Title IX Policy, UAB’s Equal Opportunity, AntiHarassment Policy and Duty to Report and Non-Retaliation Policy.

**Academic Misconduct**

UAB Faculty expects all members of its academic community to function according to the highest ethical and professional standards. You are expected to be aware of, and rigorously adhere to, the UAB code of conduct with regard to academic honesty and inter-personal relations.

Academic dishonesty and misconduct includes, but is not limited to, acts of abetting, cheating, plagiarism, copying homework, fabrication, and misrepresentation. Candidates are expected to honor the UAB Academic Code of Conduct as detailed in the most current *UAB Student Catalog*.

**Add/Drop and Course Withdrawal**

Drop/Add: Deadlines for adding, dropping, or withdrawing from a course and for paying tuition are published in the Academic Calendar available online. Review the Institutional Refund Policy for information on refunds for dropped courses.

Withdrawal: To avoid academic penalty, a student must withdraw from a course by the withdrawal deadline shown in the academic calendar and receive a grade of W (withdrawn). Failure to attend class does not constitute a formal drop or withdrawal.

**Syllabus:** This syllabus is subject to changes announced in class.
