

2026 AI Summit

Monday, May 4, 2026
ALGEN 102

The AI Summit brings together scientific leaders, clinicians, and innovators to explore the cutting edge of artificial intelligence in research and medicine. Through keynote presentations, expert panels, live demonstrations, and interactive roundtables, attendees will gain practical insight into AI's real-world applications, current challenges, and future potential.

The Summit also serves as a catalyst for new transdisciplinary collaborations among faculty – connecting data scientists, biomedical investigators, and beyond – to advance extramurally supported projects and accelerate innovation for the benefit of society.
