

## CHAMP: CHILD HEALTH RESEARCH ACCELERATION THROUGH MULTISITE PLANNING

### RATIONALE

Studies focused on child health almost invariably require multisite designs to ensure that participant accrual and retention goals are met. Cooperation among the CTSA hubs provides a unique opportunity to achieve this goal with the added benefit of coalescing the immense talent and experience among child health researchers in a wide range of areas of interest. CHAMP provides an existing infrastructure to organize, select, and manage this catalytic funding opportunity.

### PURPOSE AND GOALS

1. To provide start-up funding to create the initial team-building, design, statistical analysis, and informatics plans for high-impact multisite studies focused on child health.
2. To catalyze productive collaborations among child health researchers across the CTSA network.
3. To identify key areas in need of development (e.g., pilot data, organizational infrastructure).
4. To focus on research themes that are consistent with multiple research funding opportunities once the research team is activated
5. To develop a business/action plan with the goal of securing extramural funding within a 3-5 year period.

### REQUIREMENTS

1. The proposed research must represent novel, relevant, and high-impact topics in child health.
2. All five CTSA hubs in our pod (below) must be involved. The role of each center must be clear and unambiguous.

University of Alabama at Birmingham  
Cincinnati Children's-University of Cincinnati  
Medical College of Wisconsin  
New York University  
University of Massachusetts

3. A campus lead from each site must be identified.
4. Only a single project leader for the whole 5-campus project should be selected.
5. A case must be made as to how each site will benefit from the catalytic support
  - a. Awards will be ~ \$50,000 Direct (\$10K/site)
6. A plan for likely extramural funding opportunities must be sound
7. Awardees must agree to:
  - a. Participate in a team building conference in which an organizational chart and business plan with firm timelines and landmarks are agreed upon
  - b. Work with the UCI ICTS CHAMP administrative structure in a schedule for monitoring goals and objectives
  - c. Develop plans for extramural funding and low-cost preliminary data

## KEY DATES

Notification of Intent: Email to CCTS, c/o Jamye Hester (ccts@uab.edu) to acknowledge planned submission due COB, February 29, 2016

Internal Application Deadline: COB, March 7, 2016 (Single PDF following outline below to [ccts@uab.edu](mailto:ccts@uab.edu))

Notification of Selection: March 11, 2016

Final Application Deadline: March 15, 2016

Award Notifications: June 15, 2016

Earliest Funding Date: August 1, 2016 – December 1, 2016

## APPLICATION GUIDELINES

Formatting: Arial 11, 0.5 inch margins, submitted as a single PDF of all documents by the Key Date Listed.

Section	Content	Length
	<b>COVER PAGE</b>	
I. Cover Page	Project Title Key Personnel (at least one from each campus)	1-page
Title and Abstract	Brief overview of the key child health research questions, and goals and objectives of the project	30 lines
Biosketch	For each key personnel	
	<b>RESEARCH PLAN</b>	
Specific Aims	Describe the aims that would be part of a larger grant, after the catalytic phase has been completed	Single page
Significance	<ol style="list-style-type: none"><li>1. Explain the importance of the problem or critical barrier to progress in the field that the proposed project addresses.</li><li>2. Explain how the proposed project will improve scientific knowledge, technical capability, and/or clinical practice in one or more broad fields.</li><li>3. Describe how the concepts, methods, technologies, treatments, services, or preventative interventions that drive this field will be changed if the proposed aims are achieved</li></ol>	1/2-page
Innovation	<ol style="list-style-type: none"><li>1. Explain how the application challenges and seeks to shift current research or clinical practice paradigms.</li><li>2. Describe any novel theoretical concepts, approaches or methodologies, instrumentation or interventions to be developed or used, and any advantage over existing methodologies, instrumentation, or interventions.</li></ol>	1/2-page
Approach	<ol style="list-style-type: none"><li>1. Describe the overall strategy, methodology, and analyses to be used to accomplish the specific aims of the project</li><li>2. Describe any strategy to establish feasibility, and address the management of any high risk aspects of the proposed work.</li></ol>	1/2-page

Role and Contribution of Each CTSA	<ol style="list-style-type: none"> <li>1. Describe how each campus will contribute to the research</li> <li>2. Describe possible benefits obtained from each campus</li> <li>3. Organizational chart</li> </ol>	1/2-page
	<b>BUDGET</b>	
Budget	<p>Brief description of how you would propose to use these limited resources to enhance your ability to successfully apply for extramural funding</p> <p>It is recognized that a more detailed budget will evolve as a result of the initial catalytic meetings. Here are some examples of possible Budget Statements:</p> <p><i>Example 1:</i> “Our project involves creating an accessible data base of children who have survived PICU care for severe trauma but went on to develop cognitive, behavioral, or neuromotor longer term sequelae. We will budget to create initial individual interviews with the PICU directors at the five UC health centers and for an inaugural team building conference. At that point we will allocate remaining sources to enhance the development of preliminary data necessary for a multisite grant.”</p> <p><i>Example 2:</i> “Our project is focused on assessing executive function in children on renal dialysis across the involved CTSA. We will budget to standardize tests of executive function with the goal of producing a consensus of how to test for executive function in children requiring dialysis. At that point we will budget for a catalytic/team building meeting and we allocate funds for gathering and analyzing data in 50 children.”</p> <p><i>Example 3:</i> “Our project is focused on using telehealth techniques to provide exercise training on an individualized basis to children with cystic fibrosis at the five CTSA. We will budget for a centralized telehealth monitoring system that can easily access video feeds from individual home computers. The remainder of our funds will be used to support a catalytic/team building conference.”</p>	½ page
