Did you know there is a tool called i2b2 that can help investigators:

» determine study feasibility (sample cohort size)?
» identify potential participants for recruitment?
» perform simple data analyses of de-identified patient data?
» explore hypotheses for clinical studies/trials?

Join us for one of our hands-on trainings with i2b2 to explore using UAB’s electronic health record data for your research data needs!

Thursday, December 7
Tuesday, December 19
1:00-3:00pm
Cudworth Building, Room 305

Sessions are held on the first Thursday or third Tuesday of the month. Registration is required!

Register at www.uab.edu/ccts/events/i2b2-training

We strongly recommend attendees request i2b2 access prior to the training session at: www.uab.edu/ccts/research-commons/informatics/i2b2
Nonfaculty must have supervisor approval.

Jointly sponsored by the UAB Informatics Institute and the Center for Clinical and Translational Science (CCTS)
