Join us for an engaged discussion on:

## Using Effectiveness-Implementation Hybrid Designs in Implementation Science

---

**Tuesday, February 17, 2026  
12-1 PM (CT), via Zoom**

Join us for the next session of the **CCTS ExpeDITlons Forum**, a monthly series exploring how effective interventions, clinical approaches, and policy innovations are translated into practice across clinical, community, and public health settings. This session will feature real-world examples of hybrid study designs, including diabetes management interventions, data visualization strategies to expand HIV PrEP delivery, and an overview of hybrid design frameworks.

Featured presentations include:

- **Lisa Zubkoff, PhD** | *"Overview of Effectiveness-Implementation Hybrid Designs"*
- **Tapan Mehta, PhD** | *"Food Delivery, Remote Monitoring, and Coaching-Enhanced **ED**ucation for Optimized Diabetes **M**anagement (**FREEDOM**): A Hybrid Type 1 Optimization-Implementation Trial"*
- **Michael Mugavero, MD, MHSc, & Larry Hearld, PhD** | *"PrOTECT Alabama: Evaluating a Data Visualization Dashboard Strategy to Increase Statewide Delivery of HIV Pre-Exposure Prophylaxis (PrEP)"*
