

CCTS Clinical Research Unit (CRU)

Burt Nabors, MD

CCTS

Nursing at CRU

Nursing services of the CRU facilitate research through the delivery of expert nursing care and by providing resources necessary to assist the principal investigator in the successful completion of their research study. We offer a variety of nursing procedures and our nursing staff is very familiar with the research process. We will gladly meet with you to discuss your protocol and answer any questions you may have about our services.

Goals

1. Deliver services that meet the needs of the principal investigator
2. Provide skilled, safe, efficient and compassionate care
3. Conduct quality research

Services

- Administration of investigational medications
