

CCTS Research Commons

Jennifer Croker, PhD

CCTS

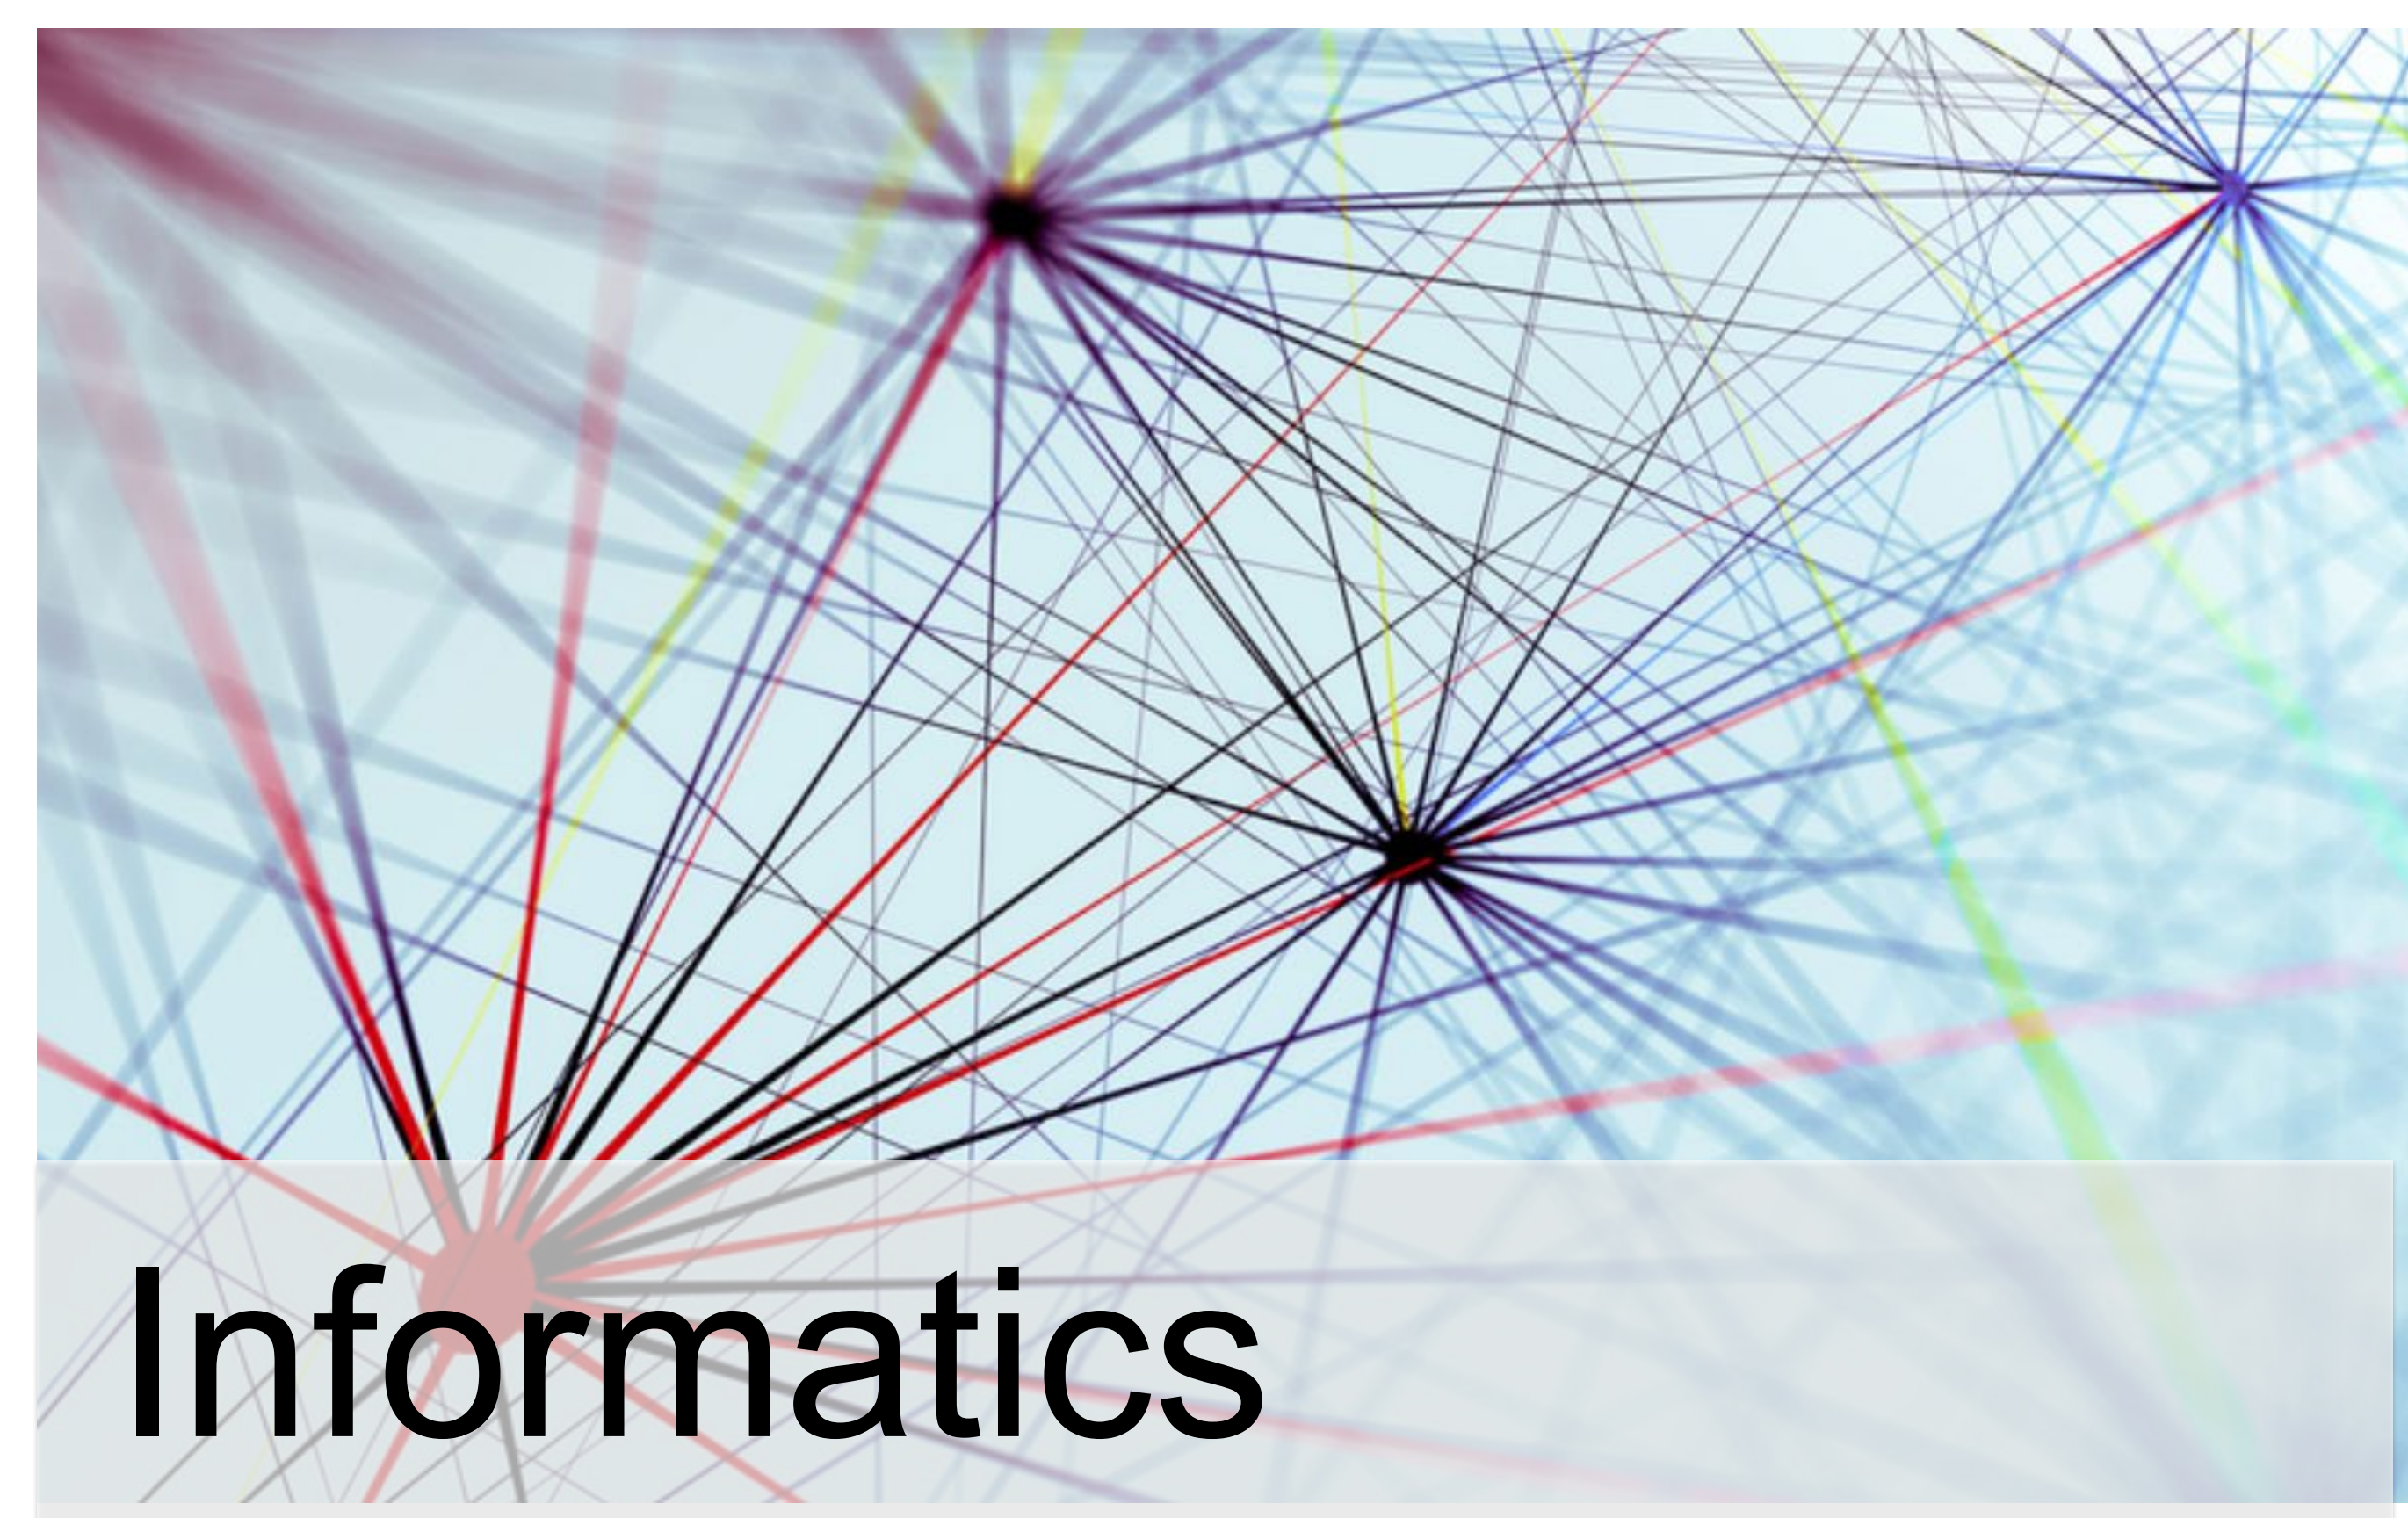

CCTS Research Commons is designed to sharpening science and accelerate the pace of discovery, thereby improving health and healthcare access in our region.

- **BERD** provides study design and data analysis consultations
- Education related to scientific rigor and FAIR data principles

- The **CCTS Panels Program** leverages community scholarship across the CCTS Partner Network to sharpen applications and invite networking

- **CCTS Informatics** enables access to clinical summary data
- Data integration platforms with development space and dissemination tools
- Study design and data analytics

- **CCTS Funding Programs** aim to foster the development of our workforce through collaboration, team science and innovative discovery.

CCTS Connects

CCTS Research Commons interconnects with **All CCTS Domains**, empowering investigators to traverse the translational research spectrum.

Funding programs are tied back to the people of our region through the **CCTS Engagement of Communities**
