583	600	Graduate Cariology	3	1st and 2nd
525	625	Design and Analysis in Clinical Research	3	1st and 2nd
608		Advanced Craniofacial Growth	3	1st and 2nd

The expectation is that students will obtain a grade of B in all courses taken. Any failures will result in remediation that might delay completion of the certificate. The overall assessment will be to evaluate the number of students who complete it in the 3-year certificate/M.S. planned timeframe. Additionally, students will be encouraged to complete National Board Examination and Board Certification in Pediatric Dentistry and their performance will be evaluated as positive outcomes for the success of their certificate training.
