

4 FACTS ABOUT ORTHODONTIC HEALTH

When you think of orthodontists, you probably think of braces.

But did you know that orthodontists offer a variety of other treatments, too?

Remember, it's not just about aesthetics...

Proper orthodontic treatment plays a crucial role in maintaining overall dental health.

Did you know that the ideal time to see an orthodontist is by age 7?

This is because early intervention can help correct minor orthodontic problems before they become more serious.

Did you know that orthodontic treatment is not just for kids?

Adults can also benefit from braces or other orthodontic appliances to improve alignment of their teeth and jaws.

Make an appointment to see your UAB Orthodontist. Be sure to ask about the UAB Employee Discount.
