

UAB Environmental Health and Safety

CELEBRATING LAB SAFETY AWARENESS WEEK

Lab Safety Awareness Week will be observed at UAB from **February 9–13, 2026**, and highlights the importance of safe practices in laboratories across campus. This week serves as a reminder of our shared responsibility to protect people, research, and facilities by reinforcing best practices, celebrating safety excellence, and encouraging continuous improvement in laboratory safety culture.

Working safely in a research lab is critical because, it

- ✓ Protects people and the environment
- ✓ Preserves research
- ✓ Maintains compliance
- ✓ Safeguards reputation

Safety First, Science Always

Work Safely in Labs

Meet the leaders supporting a culture of safety at UAB

The Environmental Health & Safety team works collaboratively across campus to promote safe research practices in laboratories and a regulatory-compliant environment for research, teaching, healthcare, and operations.

Environmental Health & Safety

- ✚ **Kenneth Lee Stone**, *Executive Director*
- ✚ **Justin Roth**, PhD, *Director, Research Safety*
