THE TIME IS NOW!
The complexity of construction engineering and management requires an understanding of the essential elements of the business, legal, and technical issues encountered in a world-wide competitive environment. Properly equipped practitioners will be positioned to assume more responsibility with commensurate benefits: higher pay and broader career advancement opportunities, while expanding their individual leadership roles corporately and in the community. The UAB Master of Engineering in Construction Engineering Management is delivered online so that working professionals anywhere in the world can learn with their peers.

TESTIMONIALS
“The CEM program was an investment in myself. My increased value and success in the construction industry is a testament to the people at UAB. It was all worthwhile and it pays off every single second of the day.”
S. Cerro, Class of 2020

“As soon as I listed being enrolled in the CEM program on my resume, doors started swinging wide open and it was incredible to see. I have told many others about the program because everything that I have learned has been so relevant to my construction job.”
H. Mills, Class of 2020

“The graduate school experience taught me time management, organizational skills, how to juggle priorities and to invest in myself.”
A. Foster, Class of 2019

“I am overwhelmed with gratitude to everyone at the CEM program for empowering me with the tools to change my life for the better.”
A. Meadows, Class of 2019

“The CEM program offers incredible and immeasurable value. It is not an accident that I am seeing such positive results and opportunities in my career.”
R. Durland, Class of 2018

“This CEM program has been a great benefit to me and will allow me to establish a great construction career.”
P. McManus, Class of 2017

CONSTRUCTION ENGINEERING MANAGEMENT
The University of Alabama at Birmingham School of Engineering offers a unique opportunity to earn a Master of Engineering (MEng) degree with a concentration in construction engineering management (CEM) to qualified working professionals who have completed an accredited undergraduate degree from any U.S. College or University.

- Increase your earning and promotion potential with a MEng degree with a concentration in CEM.
- The 30-hour degree can be completed online in 19 months.
- This degree is a great alternative to an MBA for working professionals in construction and/or engineering careers.
- This is a multi-discipline graduate program (no engineering prerequisites).
- Designed for individuals who want to interact with peers using state-of-the-art online instructional methods.
- Learn from instructors with years of industry experience.

WHO SHOULD APPLY
Individuals working for engineering and construction related companies holding a bachelor’s degree and are interested in a career path in construction engineering management.

- Engineers and architects seeking advanced project management and business skills.
- Construction superintendents and project managers overseeing small and large projects.
- General contractors and subcontractors.
- Manufacturing and material suppliers.
- Utility company and public works managers.
- Military and government employees responsible for planning and managing capital projects.
- Military personnel transitioning to civilian life.
- Women interested in capitalizing on the current industry demand to bridge the gender gap in the construction workforce.
- Individuals who desire to improve their skills in communicating and conducting business online.

TUITION AND FEES
CEM students typically sign up for two courses per academic term, but some students elect to take only one course per academic term. Students enrolled in the MEng program in CEM have an opportunity to advance their project management, construction, architectural, and engineering knowledge through a fully-online delivery method. The 19-month curriculum focuses on empowering working professionals with the knowledge to meet today’s daily construction industry challenges.

WHO SHOULD APPLY

- Individuals working for engineering and construction related companies holding a bachelor’s degree and are interested in a career path in construction engineering management.
- Engineers and architects seeking advanced project management and business skills.
- Construction superintendents and project managers overseeing small and large projects.
- General contractors and subcontractors.
- Manufacturing and material suppliers.
- Utility company and public works managers.
- Military and government employees responsible for planning and managing capital projects.
- Military personnel transitioning to civilian life.
- Women interested in capitalizing on the current industry demand to bridge the gender gap in the construction workforce.
- Individuals who desire to improve their skills in communicating and conducting business online.

ADMISSION REQUIREMENTS

- Bachelor’s degree (any discipline) from a regionally accredited U.S. College or University.
- No entrance exam required (i.e., GRE or GMAT).
- International students who do not have a degree from a regionally accredited U.S. institution are required to have a bachelor’s in engineering or a science-related field and submit TOEFL, IELTS, or Duolingo® scores.
- Original transcripts from all colleges and universities attended must be sent directly to the UAB Graduate School.
- Two years of relevant work experience or a bachelor’s in engineering or a science-related field.
- All prospective students must pass a personal live interview with the Assistant Director (Interviews can be over the phone or video conferencing for out of town students).
- Three letters of recommendation.
- Proper computer equipment and direct high speed internet access.
- All prospective students must demonstrate computer skills with a strong willingness to improve computer software skills and online communications abilities.

Note: 1. CEM promotes a multi-discipline learning experience, therefore an engineering undergraduate degree is not required.
2. Duolingo scores are preferred by the UAB Graduate School
