Note: This worksheet can be rearranged and edited as needed.

Click [here](#) for a description of the data provided in the PTA download file.

Important Note: The invalid PTA combinations may show on the report even after all expenses have been moved to a valid PTA combination. This occurs because, though the PTA combination itself is invalid, its individual segments may be valid for another PTA combination, and therefore cannot be closed or deleted. Review the dollar information to determine if expenses need to be moved.
