

What is this test called?

Fecal Immunochemical Test (FIT)

What type of test is this?

This is a test that checks for blood in your stool. It is done at home using a kit your doctor will give you.

How is the test done?

You will do this test at home. **You do not have to change your diet for this test.**

You will place a little stool on cards or in vials. The kit will come with instructions for how to mail your sample to the lab.

Will I have to take time off work?

No. You do not need to take time off work. You do this test at home at your convenience.

How often should I do this test?

What happens if the test is positive?

If the test is positive, you will need a colonoscopy to find out whether there are polyps or cancer.
