

PREPARING for CAMPUS ENTRY

UAB Healthcheck, a COVID-19 Assessment Tool

UAB Healthcheck is a COVID-19 assessment tool to help the UAB community return to campus safely and avoid further risk and exposure to COVID-19. Employees returning to campus must be free of all symptoms potentially related to COVID-19. As you return to campus, you will be asked to report the existence of any COVID-19-related symptoms, your exposure history and testing history on a regular basis using UAB Healthcheck.

Reporting symptoms and exposure using UAB Healthcheck:

You will be directed to complete your initial check-in with UAB Healthcheck as part of the web-based training course required for returning to campus (access *COVID-19: Basic Safety and Awareness Course* at uab.edu/CampusLMS). You will need your BlazerID and password* to access UAB Healthcheck.

If the survey responses indicate you are symptom-free and have no close exposure to someone with COVID-19, you are cleared to return to campus. If the responses indicate you are not cleared to return to campus, you will not be permitted back on campus until medically cleared by UAB Employee Health.

After completing your initial check-in, you will access UAB Healthcheck through uab.edu/healthcheck. The site can be pinned to your smartphone home screen so that it appears as an app, and is also available as a button on the UAB mobile app.

Employees are required to complete UAB Healthcheck daily. However, if you develop new symptoms, report them immediately. You can opt in to get daily reminders sent to you via text or email through the UAB Healthcheck tool.

*What is my BlazerID and password?

- » *Don't know your BlazerID?* Go to uab.edu/password and click the "Do I Have a BlazerID?" link.
- » *Don't know your password?* Go to uab.edu/password, enter your BlazerID and select "I do not know my password and need to have it reset."
- » *Don't know your UAB email address?* Go to uab.edu/directory, authenticate using your BlazerID and password, and search the UAB Campus Directory.
