FOREWORD

The Office of Institutional Studies and Services is delighted to present *Facts & Figures 2002-03*. This is the 23rd edition of the UAB factbook and the sixth edition available electronically on the web. *Facts & Figures* is compiled by ISS but reflects contributions from offices all over campus. We remain grateful for our contributors' continued assistance.

Our objective with this factbook is to produce a useful and usable resource for a variety of information needs. Therefore, we welcome and appreciate your comments and suggestions about the content of *Facts & Figures*.

This year's cover photograph (our first in full color) is of the recently renovated Spencer Honors House, located at 1190 10th Avenue South. The 9,326 square-foot facility was constructed in 1901 as a church building. Acquired by UAB in the 1960s, the building housed the ballet program, then became headquarters for the Student Government Association until Hill University Center was built. The Honors Program moved into the building in the summer of 1984 and shared the facility with the art history department until a major renovation in 2001-02. The renovation, made possible by a generous gift from William and Virginia Spencer, made it possible for the Honors Program to have its own facility for all the program's classes, extracurricular activities, and social events.

ROLE AND SCOPE

Adopted by the Board of Trustees October 30, 1992

Modifications Accepted February 17, 1995

Introduction

The University of Alabama at Birmingham (UAB), a publicly supported institution of higher education located in Birmingham, Alabama, is one of three institutions comprising the University of Alabama System. UAB has three major academic units: Academic Affairs, the Academic Health Center, and the Graduate School. Within Academic Affairs, baccalaureate-level academic programs are offered through six schools: Arts and Humanities, Business, Education, Engineering, Natural Sciences and Mathematics, and Social and Behavioral Sciences. The Academic Health Center offers subbaccalaureate, baccalaureate, and professional instruction through six health professions schools: Dentistry, Health Related Professions, Medicine, Nursing, Optometry, and Public Health. It also provides primary, secondary, and tertiary health care through the University of Alabama Hospital and the health clinics. Postbaccalaureate graduate degree programs are offered individually and cooperatively by all of the various schools through the Graduate School. Both Academic Affairs and the Academic Health Center house a number of special centers and institutes which focus on specific research and service areas.

This Role and Scope statement is intended to identify the proper functions of UAB and to define appropriate operating limits. In reality, a very complex set of circumstances and influences, many beyond the immediate control of the institution, determines the actual nature of the University's activities at any particular time. Within the confines of this statement, however, the University sets forth a perspective regarding its development and reflecting its own philosophy, its own understanding of the needs of its many constituencies, and its own sense of history and future. This statement is organized by functional areas, with particular concern for the efficient and effective use of available resources.

Undergraduate Education

Through the six schools within Academic Affairs, UAB offers a full range of undergraduate programs in liberal arts, technical, preprofessional, and professional studies. Also, the Schools of Nursing, Dentistry, and Health Related Professions provide accredited health profession instructional programs at the baccalaureate levels. Determining a proper role and scope for these levels of instruction requires the consideration of several factors including the current roles of other institutions, the nature and objectives of UAB's students, and the needs of the urban area.

UAB is the largest public institution offering four-year undergraduate instruction in the Birmingham area. As such, it offers instructional programs with an appropriately high level of academic quality.

At the lower-division level, the University shares its responsibility with the public junior and community colleges in the Birmingham area. Those institutions have open admission policies, and properly assure high school graduates an entry point to higher education. In contrast, the academic offerings of UAB must be of a quality, depth, and scope sufficient both to provide introductory-level offerings and to offer complete coverage in the major disciplines and relevant supporting areas for advanced study by upper-division students. Thus, it is appropriate that each academic department offering undergraduate instruction have a fully qualified faculty of competent instructors who are active scholars and professionals in their respective disciplines.

All higher education is based upon those studies comprising a traditional arts and sciences program. Its aims are the exposure to faculty who can challenge the effects of ignorance and parochialism and the provision of information concerning aptitudes, attitudes, and habits of mind basic to common human pursuits. Thus, UAB is obligated to offer strong arts and sciences subjects to form a foundation upon which more specialized vocational and technical programs can be constructed.

UAB's urban location and status as the senior public institution in the Birmingham area influence in important ways the scope of its baccalaureate programs. The University enrolls a highly diverse student body reflecting the heterogeneity of its urban environment. Included are students from many age brackets, educational backgrounds, and ethnic groups, many of whom also are employed while seeking new or improved career training and qualifications. The major components of the Birmingham economy have particular requirements for trained manpower in business, technology, and the professions. Accordingly, undergraduate programs must be adequate in scope and quality to provide support for the economic and professional development of Birmingham and the state.

Because of its location within a highly developed cultural, industrial, and economic center and because of its nationally recognized academic health center, the University is the natural setting in the state for a broad range of technical and professional training programs, including business, engineering, education, and all health-related disciplines. It is appropriate, therefore, that the overall quality and range of subdisciplines offered be fully developed, and that, where indicated, programs be multidisciplinary and mutually supportive. At the same time, students preparing for careers in these areas must be provided a core of knowledge in the liberal arts sufficient in scope and quality for them to be fully educated in the true sense and to be prepared to deal with the normative and ethical dimensions of their professions.

In support of its various academic programs, UAB is committed to a program of services and nonclassroom (nontraditional) educational experiences which enhance its students' total development. These may include social, cultural, and recreational programs and opportunities for learning experiences.

Health Professions Training

The Academic Health Center has achieved a position of national prominence as a center for the training of health professionals in Medicine, Dentistry, Optometry, Nursing, Health Related Professions, and Public Health. Each of its six schools offers a comprehensive range of programs from basic preparation to sophisticated graduate and specialty training. The Schools of Dentistry and Public Health are the only such schools in the state, and the School of Optometry is the only such public facility in the Southeast. The exceptional quality of all of its programs enables the Academic Health Center to attract substantial amounts of external funding in support of its educational, research, and service activities. Because of this level of development, the Academic Health Center serves as a resource for regional and national health professionals.

The Academic Health Center has the primary role in meeting the state's health professional needs. It establishes an appropriate reference point from which to determine the desirable growth limits of other state-supported education in the health professions. To ensure the most efficient use of public resources, the University assists the state in evaluating its health professional needs and in developing the best means of meeting those needs. Where appropriate and consistent with the maintenance of quality, UAB endeavors to extend its educational resources through such cooperative mechanisms as remote professional residency programs and outreach programs with practicing health professionals.

Graduate Education

Postbaccalaureate graduate programs are offered through the Graduate School. Graduate education transcends the presentation and assimilation of existing knowledge and specifically trains individuals for involvement in generating new knowledge through research and creative thinking.

As is the case for undergraduate education, the University also considers a variety of factors in determining the proper role and scope for its graduate programs. These factors include the responsibility of the University to take full advantage of its academic health center, the large and diverse nature of its urban constituency, the national reputation of its biomedical programs, the particular circumstances related to serving students from many backgrounds, the needs of the community which it serves, and the need to train highly qualified scholars for faculty positions.

The large number of place-bound individuals seeking graduate-level instruction for career qualification and advancement, the community's need for individuals with advanced training, and the institution's need to support undergraduate and professional student instruction mandate that the institution develop strong programs in the health professions, business, education, engineering, urban affairs, and public administration. Further, UAB's national prominence in biomedical research requires that it develop strong graduate programs in the natural, social, and behavioral sciences and in interdisciplinary fields such as nutrition, public health, health education, biomedical engineering, education for the physically and mentally handicapped (special education), medical psychology, and neurosciences. As an urban university, UAB is an appropriate setting for the development of outstanding programs in a variety of disciplines such as economics, the social sciences, and applied fields such as criminal justice, public administration, and social work.

Research

Strong educational programs include research activities of the highest quality. It is, therefore, appropriate that the University emphasize the roles of both basic and applied research. The national prominence of UAB in research dictates continuing major participation by each academic unit and specialized center.

The urban setting of the University necessitates the development of research programs responsive to the city's economic, social, and cultural needs. At the same time, responsibilities to the state and region for programs such as public health and nutrition demand similar development. The research role requires implementation of special aspects of UAB's instruction and service responsibilities.

Health Care

The Academic Health Center serves as the state's principal tertiary health-care provider, as an ultimate referral center for Alabama patients, and as a referral center for persons from across the nation who need sophisticated clinical services. UAB has attained national prominence through its many centers such as those for cardiovascular disorders, cancer, dental abnormalities, arthritis, diabetes, and disorders of the brain and nervous system.

As a part of the Academic Health Center, the University Hospital plays a prominent role in the training of health professionals. It also serves a wide spectrum of patients, including many who are indigent.

Academic Health Center units provide specialized health care for the citizens of Alabama while carrying out their mandates to develop new ideas and techniques, to treat health-related problems, and to educate health-care professionals.

Continuing Education

As the senior public institution located in the major urban area of the state, UAB has a special commitment to develop and maintain comprehensive programs of continuing education. More individuals outside the traditional 18- to 24-year age range are re-entering education, pursuing "lifelong learning" for many different purposes by means of: (1) completion of degree programs; (2) self-improvement in skills, understanding, and intellectual enlightenment; (3) vocational change or improvement (including certificate programs); and (4) professional continuing education.

UAB offers continuing education opportunities of a quality and diversity consistent with the other programs of the University. The resources of UAB mandate its primary role in the implementation of comprehensive continuing education programs in the Birmingham geographic area.

Service

A major theme permeating all the activities of a comprehensive university is service to the public. Because of its location and its strengths, UAB's service activities focus on the problems confronting the urban area and the health needs of the state and region.

Summary

The University of Alabama at Birmingham, located in the state's principal urban area, is the senior public institution serving Alabama's economic, industrial, and cultural center. Its programs and services in the health professions and in health care are preeminent in the state, and it is a regional and national resource in health-related research, training, and service. UAB's Academic Health Center and Academic Affairs units are interdependent and mutually supportive, together providing a unique resource for this state and region. The corollary is that the University must maintain the basic quality of all its programs and activities at a level consistent with its mission. At the same time, areas of special competence which emerge from its urban setting and health focus shape the ways in which the institution best serves Birmingham, the state, and the nation.

NOTE: "Total for Reporting" is the total reported to state and federal agencies and included in documents such as surveys and questionnaires.

¹The certificate programs in Health Related Professions were phased out beginning in 1994. Dental Assisting and Dental Lab Tech were eliminated in 1995; Dental Assisting was reinstated in Fall 2000. Students in the certificate programs in EMT and reinstated Dental Assisting are included with undergraduates.

²Advanced Professionals are interns, residents, and postdoctoral fellows in the basic medical sciences plus students in postgraduate programs in dentistry and optometry.

³Beginning in 1993, students taking classes off campus are included in the headcount enrollment.

¹ Appropriations are shown as originally enacted. Budgets have been prorated as follows: 1978-79 - 2.9811%; 1979-80 - 6.1406%; 1980-81 - 3.568%; 1985-86 - 4.1233%; 1990-91 - 6.5%; 1991-92 - 3%, 2000-01 - 6.2%. In FY 1992-93, UAB received supplemental appropriations totalling \$4,351,070. In FY 2001-02, the appropriation was adjusted to \$212,869,757.

² The Governor's Recommendation contained one amount for the University of Alabama System.

³ The Alabama Commission on Higher Education made its first recommendation in the 1973-75 biennium.

⁴ Beginning in FY 1988-89, figures include funding for Special Mental Health. Prior to FY 1988-89, funding for Special Mental Health was allocated separately. Since ACHE does not make a recommendation for Special Mental Health funding, the prior year's appropriation is substituted as the recommendation.

⁵ Original Appropriation amount includes FICA. FICA was not included in UAB's request or ACHE's recommendation.

⁶ FICA is included in all figures from FY 1992-93 forward.

⁷ In FY 1993-94, UAB also received \$100,000 for minority business recruitment and \$300,000 for the Bevill Center for Biotechnology. In FY 1994-95 and FY 1995-96, UAB received \$350,000 for the Bevill Center.

⁸ From FY 1995-96 to FY 1998-99, data include UAB Walker College where appropriate.

⁹ Original appropriation includes teachers retirement of \$29,763,321 which was directly appropriated to UAB.

¹⁰ Beginning in FY 1996-97, figures include funding for teachers retirement. Since ACHE did not make a recommendation for teachers' retirement funding in FY 1996-97, the prior year's appropriation is substituted as the recommendation.

¹¹ In FY 1998-99 and FY 1999-00, UAB also received \$348,735 to fund a teacher in-service center in the School of Education. In FY 2000, the amount was increased to \$351,606. In FY 2002 and FY 2003, \$296,825 was allocated for UAB through the Dept. of Education.

¹² UAB also received line items for the Cystic Fibrosis Center (\$200,000) and the Holmes Brain Tumor Research Center (\$200,000) in FY 2000-01. In FY 2001-02 and FY 2002-03, both lines were reduced to \$178,220, and UAB received \$84,420 for the emergency medicine residency program.
