Wi-Fi Setup Guide for UABSecure on Mac Computers.
Open System Preferences and Select Network.
Select Wi-Fi and select the network named UABSecure.
Enter your BlazerID and Password.

If at first this dose not work select Advanced.
Hit the **+ button** to add a new network.
Set the network name to be UABSecure with WP2A Enterprise as the security.
Enter your **BlazerID** and **Password**.

You should be able to connect to **UABSecure** now by selecting it in your Wi-Fi menu.
