This is a quick configuration guide for connecting Mac OSX to the UAB eduroam wireless network.

**Note:** If you are not from UAB, you will need to contact your home institution for assistance. More details can be found at the following address: www.uab.edu/wifi.

1. Select the Wireless symbol from the menu bar. (see image 1) When within range the eduroam Network will be displayed. Click to connect. A login box will be displayed. (see image 2)

2. You will be prompted to enter your credentials:
   - **Mode:** Automatic
   - **Username:** Your BlazerID must be in the format `userID@uab.edu`
   - **Password:** Your BlazerID password
   - **Show Password:** As required
   - **Remember the Network:** If ticked, your password will be stored in the keychain and you will not be prompted for your credentials again unless the connection fails

3. Click Join (see image 2). For further help and support please go to the WiFi web page: www.uab.edu/WiFi

4. You will be prompted to trust a certificate (details shown when you click Show Certificate button). Tick **Always trust “Dcns-cp1.ad.uab.edu”** and click **Continue**. To make changes to your Certificate Trust Settings, you may need to type in the password of your machine. Click **Update Settings** to connect.
