WELCOME MEDICAL STUDENTS
The following UAB Medical Students will participate in a four-week Anesthesia elective rotation March 2-29, 2015: Meghana Kukkamalla, Mike Lopker and Michael Wallace will be rotating in Inpatient Anesthesia; Eric Craig will be doing an Anesthesiology MS3 elective; and Alex Cotter and Shawn Price will be doing an Anesthesiology Critical Care rotation. In addition, Morgan Hull will do a rotation in the Anesthesia VA Service.

Please help make their Anesthesiology learning experience both productive and enjoyable. –Alethia Sellers, M.D.

THIS MONTH IN ANESTHESIA HISTORY
March 1847: French physiologist Marie Jean Pierre Flourens [1794-1867] determined that inhalation of chloroform caused the same temporary state in animals as did ether. Flourens is best known for proving that the respiratory center is in the medulla and the function of the cerebellum in muscular coordination; he also studied bone formation. He was a professor at the Collège de France for many years. In November 1847 Scottish physician James Young Simpson demonstrated the anesthetic properties of chloroform in humans. The Anesthesia History Calendar can be found at http://www.anesthesia.wisc.edu/AHA/Calendar/Calendar.php

TIME CHANGE---SPRING FORWARD
Remember the time changes this Saturday night (March 7). It’s not often we get a chance to get ahead in life, but we’ll be able to this weekend, when we roll our clocks forward. We will have Sunday morning to practice getting up an hour earlier, so we’re not late for work on Monday.

TUESDAY REPORT DEADLINE: Notices for publication in the TR should be submitted no later than 12 noon on Monday. Notices are accepted by telephone (4-4696) fax (5-1948), mail (JT845), and e-mail (lindhill@uab.edu). - Linda Hill
